SUPPORT LEVELS APPEAR CLOSE AT HAND Sight-Seen Market May Not Be As Bad As It Looks

The Market in Depth

What is really wrong with the coin market? Or, is there anything wrong? Something must be wrong as a massive number of minus signs have littered the columns for the last few weeks---Long Beach was the beginning of the recent downturn. Despite the fact that Long Beach finished on a positive note, the indecisiveness with which it began was just a hint of things to come. Since that time, most major marketmakers have either lowered their Bids or withdrawn them completely. This has created a general lowering of Bids altogether. However, and this is a very large component of this current rare coin market, many non-marketmakers are still doing a substantial amount of business with their clients. Furthermore, auctions are continuing to bring some healthy and active Bidding from dealers and collectors, alike. The conclusion to be drawn here is that, despite the fact that it may be more difficult for sellers to realize sight-unseen Bids at top dollar, there are a multitude of buyers out "there" who are still in the market for what they feel are reasonably priced coins. And if a potential seller is willing to offer them at less than the potential buyer is willing to pay for them on a sight-seen basis, then so much better for the buyer. This seems to be a renewed buying opportunity for those who missed out on the most recent run-up of prices.

It is definitely not the time to have to raise cash, as it is difficult to find buyers for generic coins unless it is at bargain-hunting levels. Even selling rare coins has become more difficult; a portion of the sight-unseen market nearly shutdown after Long Beach, creating a market appearance that reminded one dealer of his High School during summer vacation (a few occupants, but how serious?). Bid prices are out there, but they are so low that hardly anyone is willing to sell at these levels. Even though Bids are adjusting downward due to lowering of support levels, actual sales of non-generic coins will still take place at premiums above Bids. The only reason Bids do not reflect this higher support of actual transactions is that most Bidders will not list actual buy prices; they generally leave an open-ended buy, such as, "quote your best price".

The major areas of dealer trading, Commems, Dollars, U.S. Gold, and Type continue to respond in a negative manner. The number of minus signs prevail in large quantities, however, there are a few plus signs in some areas which indicates a small amount of stability. Further evidence of a slowing down of the current decline is the fact that the majority of issues which were lower this week, have not fallen as drastically as in recent weeks. That is, the decreases were a very small percentage of the Bid compared to earlier plunges. Examples of earlier declines were as much as 20% in many cases, with usual dips in the area of 10%. This week, many of the declines were nominal. It appears that some dealers feel that this market is about to bottom and even the marketmakers seem ready to jump back in and support the various areas of their expertise.

This Week's Market

CENTS: BU Lincoln rolls still lag behind other active areas of the market. The only change found this week was for the 1954-S roll, up to \$4 Bid.

NICKELS: Bidding activity is occasionally found for BU Jefferson rolls, although Bids are characteristically for specific issues which makes them limited in nature. This week the 1942 roll has increased to \$38 Bid and the 1947-S is up to \$9.50 per roll. However, the 1951-S has fallen (\$50 Bid) due to discounted sells.

DIMES: The Roosevelt series remains lethargic with a few minuses verifying this lack of enthusiasm. The 1946-S is down to \$120 Bid, and the 1949-S fell to \$1000. The latter issue may be the key to the series, but this points out how really soft this series is at present. The 1951-S and 52-S are also lower on the chart.

QUARTERS: BU rolls of Washington Quarters are even more sluggish than Roosevelt Dimes. This is evidenced by the fact that a long list of minus signs appears in the Washington chart. From 1948 to 1953, about half of the issues have dropped this week.

HALVES: The Franklin series remains steady at current levels with one exception; the 1955 roll is down to \$170 Bid. The Kennedy series continues to advance. Numerous issues from 1965 to 1979 are on want lists at these new higher levels.

DOLLARS: The Silver Dollar market continues to observe corrections in the MS-63, 64, and 65 columns. Although the number of declines makes this series appear temporarily bleak, support for most issues seems to be at hand.

PROOF SETS and MINT SETS: The majority of Proof Sets are stable at today's levels. The "S" less sets have advanced to even higher levels. Mint Sets continue active with several sets moving up this week.

COMMEMORATIVES: A whole lot of minus signs can be found in the Commem columns. Dealer support has fallen considerably over the last several weeks. There may be one bright spot in all this gloom. Discounting has slowed in the Gold Commem columns, and, in fact, there are a few plus signs among the smaller number of minuses this week.

TYPE: The Type market continues to show weakness as minus signs are scattered throughout the charts. Keep in mind, Type coins ran several weeks with plus signs filling the charts, so this should not be unexpected. Again, there are a few plus signs for those who look for positive indications.

GOLD: U.S. Gold remains quite soft as marketmakers lower their Bids even further. A few scattered plus signs can be seen, thus, giving a ray of hope. Circulated gold appears to be a little stronger in the higher denominations.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz-\$404/\$417, 1987 1 oz-\$420/\$450, 1/2 oz-\$200/\$220, 1988 1 oz-\$645/\$675, 1/2 oz-\$300/\$320. Proof Silver Eagles are trading at: 1986-\$25.50/\$27.50, 1987-\$19/\$20.50, 1988-\$50/\$54. BU 1986 Silver Eagles are wholesaling at \$12.10/\$12.60.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific *CDN* Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to *CDN* Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to *CDN* as 100% base level. Data from latest issues of *CDN*, *Monthly Summery*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CDN to designate the exact quality of Brilliant Uncir-
culated coins.MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damageMS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins
graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards
as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the
listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

"I WILL GET RESULTS FOR YOU!"

Jim Halperin
Jim Halperin

"It is my firm belief that the foundation of numismatics is the true lover of rare coins, the collector. With a broader collector base within the ANA membership, everyone will benefit. Our Association will be stronger, more dynamic, and more responsive to members' needs. Our market will be more stable. And our hobby will enjoy a bright future of vitality and growth.

"The only way for the ANA to be effective is for collectors and professional dealers to work together in a spirit of mutual respect and cooperation. As a member of the ANA Board of Governors, I will work with my fellow governors, both collectors and dealers, to implement the following program. You have my word on it."

For Your Hobby

A campaign to include photographs of significant coins in school history textbooks. A touring museum exhibit of the finest and rarest coins, sponsored by the ANA.

Results: New, younger collectors will keep the hobby vital and growing for the future.

For Your Market

An ANA-sponsored dealer task force dedicated to generating greater interest in coin collecting among coin investors. A campaign to offer ANA membership to the mailing list of the U.S. Mint.

Results: A broader collector base means a more stable market.

For Your Association

A national public relations and advertising campaign promoting the hobby and membership in the ANA to potential new collectors. Expanded services for hobbyists.

Results: A more dynamic and responsive ANA means more value for your membership dues.

An expanded, improved *Certified Coin Dealer newsletter*. The "old" *Bluesheet* was already a great Value - which makes this the opportunity of the decade. We invite you to join in our continuing success.

If you think
we've only im-
proved the
Bluesheet,
Just wait until
you see what we
have planned
for the

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

Selected Quality NCI Gold and Silver Dollars are the hottest coins on the market as I pen this ad.

I see prices on nice coins doubling within 2 years and if you remember an insert I ran several months ago, I offered a \$5 gold coin Free if the coin did not double after 2 years.

Well, we sold plenty of coins from that insert.

We no longer offer the 2 year guarantee, but we will send you a \$5 gold piece Gem BU (No, it's not a \$5 Indian worth \$8,000, Mr. Frickell from San Bernadino) with every order over \$1,000 !

All orders shipped Postpaid via registered mail fully insured to your front door.

We guarantee you will be pleased.

30 day Money-Back Return Grace with each and every coin purchased.

We're Life Members of so many darn numismatic organizations I've lost track.

MS 65 PROOF-LIKE (GEM UNCIRCULATED PROOF-LIKE) WILL exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOF-LIKE (SUPERB) WILL be 100% fully struck—and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 - MS-63. Any further qualifications, see Singles Page 4.

BU DOLLAR ROLLS

Put-together rolls will bring more or less depending on individual quality. Refer to Singles, Page 4.

PLUS SIGNS ENCOURAGING TO DEALERS Auction '89 To Test Market Recovery

The Market in Depth

The recent downturn in the certified market, while severe, is showing encouraging signs of being short-lived. Plus signs are starting to appear. Although Bids for premium specimens are still quite a bit lower than six weeks ago, values in the marketplace have not dropped as severely as the Bids had. Add to this the fact that collectors are still actively buying during the turmoil, and you have all of the ingredients for a major test of the market's recovery.

AUCTION '89 takes place this week, and it promises to be as special as all of the other "apostrophe" sales. It's hard to say enough exciting things about an effort that has brought the numismatic community ten straight spectacular sales, realizing over \$90 million. And how do you summarize an auction where every lot is a star, and any dozen lots would make any other auction into a major event? The coins are there, and the interest is there. We'll know next week if the dollars were there as well.

The participating auction companies are as follows: RARCOA, Stacks', Superior, and David Akers Inc.

Coin Dealer Newsletter: Certified Coin Market Indicator™

SERVICE	LOW	HIGH	AVERAGE
PCGS	82.5%	125.8%	101.2%
NGC	83.1%	127.5%	101.4%
ANACS	95.1%	131.9%	113.1%
NCI	29.0%	69.5%	42.8%

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific *CDN* Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to *CDN* Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to *CDN* as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series and issues refer to July 1988 *Monthly Summary*.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins

MS-64 Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market

closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

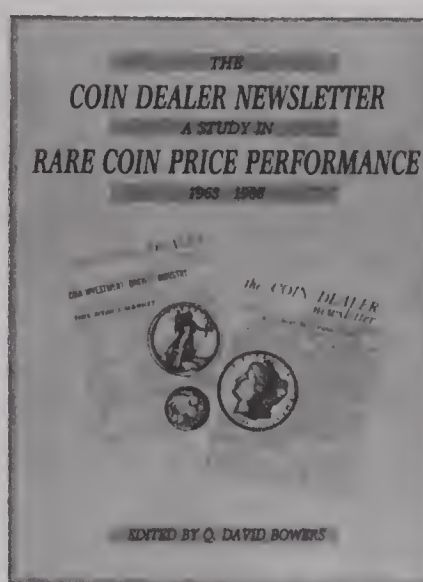

In addition, the volume contains market studies, articles, and commentaries by many of the best-

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

MS 65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS 67 & MS-67 PROOF LIKE (SUPERB) will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 MS-63. Any further qualifications, see Singles Page 4

AUCTION '89 YIELDS \$19 MILLION 1804 Dollar Tempts \$1 Million Mark

The Market in Depth

Sales records were smashed as Auction '89 realized more than \$19 million; as one participant dryly noted, "Not bad for only 2,000 lots". Of course, with the total for the ten prior sales standing above the \$90 million mark, the \$100 MILLION total barrier has been soundly smashed. The totals were certainly helped by the sale of the 1804 Dexter-Bareford Class I Silver Dollar at \$990,000; how close can you get to the first \$1 million coin? Last week we echoed the question dealers were asking: Will the dollars be there? The market has soundly answered that question!

This Week's Market

CENTS: The usually quiet BU Lincoln roll series found a couple of downward adjustments this week. The 1939-S fell to \$50 Bid, while the 1943-D dropped to \$42. The 1989-S Proof roll is newly listed at \$275 Bid with a \$325 Ask.

NICKELS: BU rolls of Buffalo Nickels are status quo; however, BU Jefferson rolls have a few advances. The 1942 roll is up to \$40 Bid and the 1943-S (war-time) roll is higher at \$135. The 1948-D and 49-D have climbed to \$22 Bid.

DIMES: Both the Mercury and Roosevelt Dime series were steady this past week. No changes had been monitored as of this writing.

QUARTERS: The Washington Quarter series finds several issues dipping slightly this week. The 1941-D fell to \$700 Bid, while the 1943-D was off at \$525. In addition, the 1948-S was down at \$240, as was the 1950-S. Lastly, the 1952-S roll was lower at \$280 Bid.

HALVES: The Franklin and Kennedy series remain active at current levels with several buyers competing for available rolls. The only noticeable change was for the 1957 Franklin roll; now up to \$260 Bid.

DOLLARS: MS-63 Dollars seem to have stabilized this past week, however, the MS-64 and 65 columns continue to reveal numerous minus signs. One positive note may be that Peace Dollars appear to be much more stable at current levels than do Morgan Dollars.

PROOF SETS and MINT SETS: Proof Sets are steady at current levels with a few advances. Mint Sets are mostly steady with a couple declines.

COMMEMORATIVES: The Commem charts remain one of the weakest areas of the market due to lower dealer Bids. Nonetheless, there still seems to be a lot of activity taking place. Buyers may not be willing to offer higher Bids, but if they want to purchase needed material from potential sellers, they must pay well over current Bid levels.

TYPE: The Type market has numerous adjustments to Bid levels, and although many minus signs are evident, there are also plenty of advances. Dealers feel this could be a prelude to a future firming trend.

GOLD: The U.S. Gold chart continues to reveal a weakening of dealer Bidding support. Not only are Bids lower, but sell prices are also sliding for the more commonly encountered issues. Thus, many issues have declined this week.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz-\$407/\$422, 1987 1 oz-\$415/\$444, 1/2 oz-\$202/\$223, 1988 1 oz-\$645/\$680, 1/2 oz-\$300/\$315. Proof Silver Eagles are trading at: 1986-\$26/\$28.50, 1987-\$19/\$20.75, 1988-\$51/\$55. BU 1986 Silver Eagles are wholesaling at \$12.10/\$12.50.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer Newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

How to get everything you want...and more !

It's never been easier or more profitable
to get the coins that you've been looking for!

- **Here's why:** Tangible Investments of America (TIA) is one of the largest wholesale rare coin dealers in the world! We specialize in the finest high grade material.

You now have the the opportunity to buy from us directly, *before* anyone else.

Our newly developed program will give you a buying edge in the market you never had before.

Consider this: If you've purchased high grade rare coins this past year from another dealer, chances are you purchased at least one of our coins!

- **How can we say this?** We sell millions of dollars worth of rare coins each month to many of the largest retail dealers! TIA's chairman, **Silvano DiGenova**, is one of the most powerful buying forces in the market, regularly purchasing millions of dollars worth of the very best rare coins. Most recently, he purchased and sold a *complete set* of high grade PCGS Morgan Dollars! Among his other purchases is the famed Clifford-Kagin Territorial Gold Collection, valued at close to 5 million dollars! By dealing with us, you will have the buying ability of Silvano DiGenova working for you! Doesn't it make sense to purchase your coins directly from us?

- **Here's how:** Fill out the form below and you will be notified *first* when we purchase any coin that you may be interested in, *before* we offer it for sale to any other dealer.

Best of all, there is no obligation to purchase anything! You just can't lose!

- **Here's more:** Take the time to complete the form below and we will give you a FREE trial subscription to our money-making newsletter, the *Tangible Investment Advisory*.

You can make money just by being a FREE subscriber to our newsletter!

- **Don't wait:** The sooner we receive your completed form, the sooner we can begin to work for you. Remember, as a special bonus you will receive a FREE trial subscription to the *Tangible Investment Advisory*, must reading for anyone involved in rare coins. Don't delay, act NOW!

Yes, I'd like to be the first to know when these coins become available. Please call me as soon as possible! Also send me my FREE trial subscription to the *Tangible Investment Advisory*. I understand that I am under no obligation to purchase anything.

We Deliver Your Slab In 30 Days Or You Don't Pay

The Ultimate Slab Against Counterfeit Grading

Have you noticed how less costs more with many big grading services? Just when other services are raising their fees while **not** honoring their turnaround time guarantees, Photo-Certified Coin Institute is taking action to meet dealers demand. Now PCI offers more for less...A **guaranteed** fast turnaround time for considerably less money. Just check our fees below. Write or call for a **FREE** submittal package. If you wish to receive an actual sample slab of a '55-S dime with your submittal package add \$5 for postage and insurance. Or use the convenient form below to submit coins to give us a try.

On the occasion of the twenty-fifth Anniversary of the *Greysheet*, We **EXPANDED** the *Bluesheet*!

The *Certified Coin Dealer newsletter* may only be in its fourth year, but it's never too early to make improvements. As part of the *Greysheet's* twenty-fifth anniversary celebration, the entire staff rededicated their efforts to serve our subscribers with the finest numismatic pricing information available. In the future, you will be seeing even more improvements in the CDN family of publications – not an easy job when you are already the market leader in providing accurate, unbiased, timely information.

In addition to the 543,004 prices *Bluesheet* subscribers now receive annually, we added:

Plus the nicest surprise of all – despite the cost of adding tens of thousands of new prices every year, we can still offer tremendous savings for annual subscribers, and **incredible** savings on multi-year subscriptions.

An expanded, improved *Certified Coin Dealer newsletter*. The "old" *Bluesheet* was already a great Value - which makes this the opportunity of the decade. We invite you to join in our continuing success.

If you think
we've only im-
proved the
Bluesheet,
Just wait until
you see what we
have planned
for the
Greysheet!

MS-65 PROOF-LIKE (GEM UNCIRCULATED PROOF-LIKE) will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOF-LIKE (SUPERB) will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 - MS-63. Any further qualifications, see Singles Page 4.

BU DOLLAR ROLLS

Put-together rolls will bring more or less depending on individual quality. Refer to Singles, Page 4.

BIDDING ACTIVITY DECLINES FURTHER

The Coin Market May Change But The Collector Will Live Forever

The Market in Depth

Over the last couple of months, the stability, and therefore, the longevity of the rare coin market has come under the "GUN" due to the wild fluctuations of the sight unseen bidding theory by the supposed high Bidders and their investor clients. It has been known and tested in the past whereby, investors, who venture in and out of the market, will create havoc with the normal pricing structure of the coin market. This is true whether they try to buy common coins or those harder to find "rare" coins. Over this same period of time, the collector market has remained relatively stable, in that, collectors are ready and willing to purchase the coins needed for their sets. However, except for some limited cases, they have tried to stay on the sidelines when they thought that various coins were advancing more than they felt were reasonable to expect. In fact, some collectors went so far as to sell off some of their precious coins, due to the fact that high potential profits made the individual collector a prudent businessman, thus, taking those massive profits and putting them into other unexplored areas of numismatics.

The ultimate conclusion to be drawn here is that the collector will always remain as the base of the coin market while the investor who moves in and out of the market, imagining that numismatics can be like the stock market, will cause prices to fluctuate radically, thus creating further verification of the old axiom: What goes up must come down. As supplementary evidence of the collector being the backbone of the coin industry, one need look no further than recent auctions and their results as the rarer collector-type coins almost always have an abundance of Bidders who are willing to pay in advance of Bid levels for the privilege of obtaining these specimens.

As active as auctions may be of late, it appears that Bidding in the marketplace for generic coins has slowed markedly; this may be due to the usual summer slowdown as dealers and their clients go on holiday. The "summer doldrums" usually takes its toll about this time of year and it always seems to surprise most dealers. Why is it harder to find buyers for specific coins when they know the particular coin should be easily salable, but isn't? It's quite simple. Most dealers have plenty of inventory and do not need to add to it, especially when sales are slow. Most dealers feel there will not be any strong upward movement until the ANA Convention in early August, in Pittsburgh.

In the meantime, Bidding activity seems to be sporadic at best as dealers move into and out of various series depending on their specific needs. The main problem right now seems to be that there has been a dramatic decline in the number of Bids being posted along the dealer networks, which further creates an appearance of self-inflicted weakness. When the market is more stable, most marketmakers will leave their Bids

stationary, even in series where they are not ardently seeking coins.

This Week's Market

CENTS: BU Lincoln rolls have several minor changes this week as dealers attempt to locate various issues. Those issues advancing are late-dates and they are needed in bag quantities. A couple of dates are lower.

NICKELS: The BU Jefferson roll chart is mixed as a few dates move according to dealer activity. Those on the rise are 1948-D and 49-D; Bid at \$25 each. Falling slightly were 1944-S, 45-D, and 64-P & D.

DIMES: BU Mercury Dime rolls do not get a lot of attention lately because most dealers cherry-pick the high grades and then "dump" the balance of the roll. When the occasional roll appears on the market, most dealers suspect it has been cherrypicked. The 1944-S roll has fallen this week to \$525 Bid.

QUARTERS: BU Washington Quarters remain fairly stable this week. The one exception is the 1940-S which declined to \$640 Bid. The remainder of this series is unchanged.

HALVES: Walkers, Franklins, and Kennedys are all steady at today's levels. The only change found the 1957 Franklin roll moving higher to \$275 Bid. Otherwise, all three series were unchanged.

DOLLARS: The minus signs have slowed considerably in the MS-63 and 64 columns, although the 65 column continues to undergo declines. Several of the rare date issues have fallen, not due to discounted sells, but due to the withdrawing of the high Bids by the dealers who originally ran them up. This does not mean the rare dates are worth less, it is just indicative of lower support levels.

PROOF SETS and MINT SETS: These two areas have very few changes as they remain steady at today's levels. There seems to be a considerable amount of activity here as dealers maintain their current Bids.

COMMEMORATIVES: The Commem market is very mixed. MS-64 and lower Silver Commems seem to be stabilizing somewhat as fewer minus signs are apparent. In the MS-65 column, there is still a numerous amount of minuses, however, some pluses are sneaking back in there. Gold Commems have a few minuses, but more pluses appear with most issues unchanged.

TYPE: The Type market is trying to do its part in stabilizing the current downward trend. There are numerous plus signs throughout the charts, however, minus signs still pop up here and there.

GOLD: The U.S. Gold chart reveals a goodly amount of plus signs in the Mint State columns. Better yet, there are very few minus signs. The circulated market is still another story as Bids falter.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$406/\$425, 1987 1 oz-\$415/\$437, 1/2 oz-\$200/\$225, 1988 1 oz-\$645/\$680, 1/2 oz-\$300/\$315. Proof Silver Eagles trade at: 1986-\$26/\$27.50, 1987-\$19.25/\$21, 1988-\$50/\$54. BU 1986 Silver Eagles wholesale at \$12/\$12.40.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

CLAIM YOUR FREE SILVER!

An unprecedented offer never before made! For only \$5 for postage and insurance, we'll send you a FREE PCI slabbed coin (a choice, new '55-S dime, ungraded) so you can see for yourself the Picture-Perfect Security® slab from Photo-Certified Coin Institute and its many advantages. But hurry, we only have ~~400~~¹⁵⁰ free slabs.

Get The Picture Perfect Security® Slab With These Advantages

- 1. PRICE** – Only \$10 per item for coins valued at less than \$100 raw...and for coins valued more, our fees are comparably low...far less than any other service.
- 2. TURNAROUND TIME** – We guarantee 30 days or less processing time or you don't pay. Plus a 3 day and 12 day priority service is available.
- 3. VETERAN GRADERS** – PCI graders were not "just hired," but rather have a minimum of 15 years experience in rare coins. Our 6 senior graders have passed both rigid written and verbal tests and some of them are members of the Professional Numismatic Guild.
- 4. COUNTERFEIT-PROOF** – We have more hidden detection devices against counterfeiting than any in the industry. After a grade is finalized, the case is sonically welded creating a hermetic seal, with an identification tag embedded in the tamper proof plastic slab. The patented case is unique in that it contains not only the coin but a color photograph of the coin. A color negative of every coin is kept in file at PCI for your verification in case of loss or theft of your coin.
- 5. MORE FOR LESS** – At a time when other grading services are giving less for more (a suspension of guarantee turnaround time while increasing fees), PCI is meeting both public and dealer demand by offering much more for lots less...quicker turnaround time at far lower costs.
- 6. OPEN INVITATION** – Anyone can send their coin to Photo-Certified Coin Institute. PCI is not a dealer, not affiliated with any coin company, impartial and independent. It's your private business.

REGULAR FEE SCHEDULE

- \$10 fee** for each coin valued under \$100 (guaranteed 30 days service)
- \$18 fee** for each coin valued over \$100 (guaranteed 30 days service)
- \$30 fee** for 12 days service regardless of coin value
- \$50 fee** for 3 days service regardless of coin value

MS-65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) will have the same characteristics as the MS-65 -- but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOF LIKE (SUPERB) will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 - MS-63. Any further qualifications, see Singles Page 4.

BU DOLLAR ROLLS

Put together rolls will bring more or less depending on individual quality. Refer to Singles, Page 4.

MARKET TURNS EVER SO SLIGHTLY

Most Active Areas: Dollars, Commems, & Type

The Market in Depth

This past week has seen the rare coin market reach a level of stabilization (in most areas), with some series featuring plus signs in the MS-64 and 65 columns. With the exception of just a few minus signs, the Commemorative and Dollar markets are seeing some higher Bidding by dealers. This is especially welcome as Commemoratives have been among the weaker issues since Long Beach. For many years, dealers have pointed to Commems as one of the bellwethers of the collector's market; when Commems were active and advancing, it was a sure sign that the collector market was active and advancing. During the past two months, commems provided us with a much different bellwether---the state of the Bidding market as opposed to the real market. Even while Bids were declining on Commems, demand from collectors (according to numerous dealers) continued strong. Bids were declining not because of less demand or increased supply, but because dealer's cash flow suggested that it would be more prudent to maintain a lower inventory. Commems were a perfect example of the new phenomena of Bids reflecting the current state of dealer's finances as opposed to the current state of demand in the marketplace. Of course, this can translate into a real opportunity for the collector if you can find a dealer with an "overabundance" of coins and a "desire" for cash.

If any series offered competition to the Comems as the number 1 indicator of the market, it would have to be Morgan dollars. Here again, the last two months have seen some real volatility in the Bids that were only partially matched by the volatility in the marketplace. Substantially lowered Bids on the generic Morgans resulted in few offers to sell, but they did ultimately have the effect of dragging down many of the Bids on higher quality specimens. Of course, short cash is short cash, and will affect Bids on everything from Dollars to Dahlongas. However, the ever popular Morgan is a favorite cash flow mechanism for dealers, since the incessant demand provides easier opportunities for liquidation when the need is perceived to build cash. This again can spell real opportunity for the collector who has many wants, is not particularly fussy about the order of priorities on his purchases, and has built up a solid relationship with a local dealer.

Many dealers report that their clients are once again in the market for specific issues, especially at the new lower levels. In fact, based on the number of comments we have received, it is evident that many dealers and their customers were never "out of the market"; they were just trying to buy at discounts---being concerned with the downward trend of the market. Now they seem satisfied that the market has bottomed in certain areas and they are actively Bidding again---and at even higher levels in some cases.

This Week's Market

CENTS: The BU Lincoln roll market has numerous changes as dealers attempt to sell unwanted dates. A few of the declines were for early dates: 1939-D, 42-S, and 45-P. However, among the changes for later issues (1968 to 1988) were a large number of plus signs.

NICKELS: The BU Jefferson series had very few changes this week. The 1944-P roll fell to \$140 Bid, while the 1948-D and 49-D rolls each climbed to \$27 Bid. A few late-date rolls in the 80's also increased slightly.

DIMES: The Mercury Dime series is steady, while Roosevelt Dimes suffered losses only to the late silver rolls. The 1960-64 issues fell to \$21 Bid. The only other changes were to the upside for late-date clad rolls.

QUARTERS: BU rolls of Washington Quarters are experiencing some softness in the earlier issues. This is generally due to a lowering of Ask prices by the potential sellers. In many cases the issues go unsold. Also down this week were the silver related issues---from 1959 to 1964.

HALVES: For the most part, the half dollar series (Walkers, Franklins, and Kennedys) are steady at current levels. There are a couple of changes in the Franklin series; the 1952-D fell to \$200 Bid, while the 1957-P rose to \$285 and the 61-D to \$85. The Kennedy series appears to be the most active as a multitude of plus signs can be found in the issues from 1971 to 1988.

DOLLARS: The Dollar market seems to have made a sharp turnaround as several pluses (no minuses in Morgans) appear in the MS-63 column. And even a little more positive are the MS-64 and 65 columns with numerous pluses (only a few minuses).

PROOF SETS and MINT SETS: Proof Sets are steady at today's levels; the 'S' less sets continue to move higher. Activity for Mint Sets is increasing as several dealers compete for the available supplies.

COMMEMORATIVES: With the exception of a few minus signs in the MS-64 column, the commemorative market seems to be holding steady with upward movement in the MS-65 column. This should be delightful news to collectors of this series.

TYPE: The majority of changes in the Type chart are of a positive nature. The Type market seemed to be a little stronger over the past few weeks than other series, so the plus signs should not come as much of a surprise to most dealers.

GOLD: Mint State U.S. Gold is beginning to show signs of life after all. While the recent “cash crunch” took place, many dealers lowered their Bids as a defense mechanism. Many Bids dropped as prices were deflated. Now it looks as though this market is back.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$407/\$425, 1987 1 oz-\$420/\$430, 1/2 oz-\$205/\$225, 1988 1 oz-\$645/\$680, 1/2 oz-\$310/\$315. Proof Silver Eagles, trade at: 1986-\$26/\$27.50, 1987-\$19/\$21, 1988-\$48/\$52. BU 1986 Silver Eagles are trading at \$12/\$12.50.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific *CDN* Bids in order to determine current market for certified coins.

A weekly comparison of retios of certified coin Bid levels relative to *CDN* Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to *CDN* as 100% base level. Data from latest issues of *CDN*, *Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market; and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

TYPE CONTINUES TO LEAD CURRENT MARKET Pittsburgh ANA & Auction On Docket

The Market in Depth

The current strength of the rare coin market remains the prime topic of conversation among dealers. The bourse floors and teletypes are all ablaze with their latest opinions on the market and the latest news about how it is affecting each dealer individually. As might be expected, the results run the gamut from terrible to terrific, and the dealers accordingly reflect their personal experience on the market as a whole.

Distilling all of this input, the market looks stable to perhaps just a touch lower on some issues---some of the generics are settling just enough to produce minus signs. Overall the market seems to be solidifying for the ANA Convention in Pittsburgh next week. Like the Long Beach Show, these major gatherings of numismatists provide the strongest evidence of the current state of the market. And as at Long Beach, there will probably be plenty of material available at the ANA Conventions. Depending upon cash flow considerations and market demand, dealers are anticipating a basically stable market with some minor adjustments. This may spell some buying opportunities for dealers or collectors with cash.

The strength of the collector portion of the rare coin market has been evident in recent auction offerings, and will be demonstrated again soon at Bowers & Merena's ANA Convention sale, the Collection of Dr. Nelson Page Aspen. As opposed to so many recent auction offerings which give only passing notice to the world of numismatics beyond U.S. Coins (and especially beyond slabbed U.S. Coins), the Aspen sale is notable for both the depth and breadth of its foreign offerings. From the ultra-rare 1858 Seated Dollar to the classic Una and the Lion, the Aspen sale has the coins that will make this an exciting and memorable event for coin collectors.

Another interesting test of the "collector" market will be the disposition of the 1804 Dexter-Bareford Dollar which recently sold at Auction '89 for \$990,000. The coin is being marketed by Hugh Sconyer's American Rare Coin Fund Ltd, (backed by Kidder, Peabody & Company) and Blanchard and Company. Blanchard was a previously undisclosed partner in the purchase of this "King of American coins", and recently announced that it will act as the Fund's principal retail marketing arm. The marketing tie-in is obvious and mutually beneficial, since both Kidder, Peabody and Blanchard are owned by units of General Electric Financial Services. The funds raised by the Limited Partnership offering provided the capital for a major purchasing presence in the coin market, and Blanchard's retail marketing activities provide widespread outlets for placing the material in the hands of the consumer. This is no doubt the face of the future, as more Wall Street funds sally forth into numismatics. Will the purchaser of the 1804 Dollar be a collector or another fund?

This Week's Market

CENTS: The BU roll market is usually influenced quite heavily by the summer slowdown. Not that there is an abundance of activity throughout the year, it's just that dealers participate in BU rolls even less during the summer months. BU Lincoln rolls bear this out as changes for this week are very sparse.

NICKELS: The Jefferson Nickel series is not faring much better as numerous issues fell this week due to discounted "offers to sell". The only bright spots were the sought-after 1948-D and 49-D rolls, which climbed to \$30 Bid.

DIME: BU Mercury Dime rolls are finding sales a little difficult. A few late issues have fallen as discounted sells fail to attract buyers. The Roosevelt series is relatively quiet as only one issue changed in the chart; the 1955 roll is down to \$54 Bid.

QUARTERS: There are several changes in the Washington series this week, although the majority of increases have occurred for the late-date clad issues. In the silver issues, the 1942-S and 56-D are both higher at \$2275 and \$55, respectively. The 1946-S and 55-D, both declined.

HALVES: All three Half Dollar series have remained fairly stable. The usual buyers are still visible for Franklins and Kennedys, thus keeping Bids virtually intact.

DOLLARS: The Dollar market appears to be fairly stable at today's levels. Very few minus signs appear in the charts, with a larger sprinkling of pluses. MS-63 Prooflike specimens continue to be a hot item.

PROOF SETS and MINT SETS: Proof Sets are mixed. The silver sets are steady; the early clad sets are higher (1971-S to 1978-S); and a few of the later clad sets have fallen. Mint Sets remain stable at current Bids.

COMMEMORATIVES: Most of the Silver Commem market remains as it was last week; steady in MS-63 and lower, with plus signs in MS-64 and 65. However, the Gold chart has a scattering of minuses in MS-63 to 65. The MS-64 column seems to have been hit the hardest as Bidders dropped their buys dramatically.

TYPE: The Type charts are practically covered with plus signs as numerous buyers seem to be in the market for quantities of coins. Whether or not this market holds over the next two weeks (through ANA) remains to be seen.

GOLD: The Gold chart seems tentative at best. Several dealers seem to be ignoring this area of the market; other dealers are hopeful that this is a temporary situation.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$403/\$423, 1987 1 oz-\$412/\$440, 1/2 oz-\$195/\$218, 1988 1 oz-\$645/680, 1/2 oz-\$295/\$315. Proof Silver Eagles trade at: 1986-\$26/\$28, 1987-\$19/\$21, 1988-\$48/\$52. BU 1986 Silver Eagles are trading at \$12/\$12.30.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

How to get everything you want...and more !

It's never been easier or more profitable
to get the coins that you've been looking for!

- **Here's why:** Tangible Investments of America (TIA) is one of the largest wholesale rare coin dealers in the world! We specialize in the finest high grade material.

You now have the the opportunity to buy from us directly, *before* anyone else.

Our newly developed program will give you a buying edge in the market you never had before.

Consider this: If you've purchased high grade rare coins this past year from another dealer, chances are you purchased at least one of our coins!

- **How can we say this?** We sell millions of dollars worth of rare coins each month to many of the largest retail dealers! TIA's chairman, **Silvano DiGenova**, is one of the most powerful buying forces in the market, regularly purchasing millions of dollars worth of the very best rare coins. Most recently, he purchased and sold a *complete set* of high grade PCGS Morgan Dollars! Among his other purchases is the famed Clifford-Kagin Territorial Gold Collection, valued at close to 5 million dollars! By dealing with us, you will have the buying ability of Silvano DiGenova working for you! Doesn't it make sense to purchase your coins directly from us?

- **Here's how:** Fill out the form below and you will be notified *first* when we purchase any coin that you may be interested in, *before* we offer it for sale to any other dealer.

Best of all, there is no obligation to purchase anything! You just can't lose!

- **Here's more:** Take the time to complete the form below and we will give you a FREE trial subscription to our money-making newsletter, the *Tangible Investment Advisory*.

You can make money just by being a FREE subscriber to our newsletter!

- **Don't wait:** The sooner we receive your completed form, the sooner we can begin to work for you. Remember, as a special bonus you will receive a FREE trial subscription to the *Tangible Investment Advisory*, must reading for anyone involved in rare coins. Don't delay, act NOW!

Yes, I'd like to be the first to know when these coins become available. Please call me as soon as possible! Also send me my FREE trial subscription to the *Tangible Investment Advisory*. I understand that I am under no obligation to purchase anything.

ENGINEERED FOR UNBIASED GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating the standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Numismatic Guaranty Corporation has over 300 Charter and Associate members. *Look for premium quality, NGC certified coins at the following Charter Member/Dealers.*

On the occasion of the twenty-fifth Anniversary of the *Greysheet*, **We EXPANDED the *Bluesheet*!**

The *Certified Coin Dealer newsletter* may only be in its fourth year, but it's never too early to make improvements. As part of the *Greysheet's* twenty-fifth anniversary celebration, the entire staff rededicated their efforts to serve our subscribers with the finest numismatic pricing information available. In the future, you will be seeing even more improvements in the CDN family of publications – not an easy job when you are already the market leader in providing accurate, unbiased, timely information.

In addition to the 543,004 prices *Bluesheet* subscribers now receive annually, we added:

Plus the nicest surprise of all – despite the cost of adding tens of thousands of new prices every year, we can still offer tremendous savings for annual subscribers, and **incredible** savings on multi-year subscriptions.

An expanded, improved *Certified Coin Dealer newsletter*. The "old" *Bluesheet* was already a great Value - which makes this the opportunity of the decade. We invite you to join in our continuing success.

If you think
we've only im-
proved the
Bluesheet,
Just wait until
you see what we
have planned
for the
Greysheet!

BIDDING ACTIVITY SLOWS AS A.N.A. UNFOLDS Type Market Tentative As Market Looks For Direction

The Market in Depth

Editor's Note: Due to the fact that many of the nation's marketmakers are travelling to and attending the Pre-ANA and the ANA, Bidding activity is very sparse this week. We have monitored all the usual means of communications and found trading very light. This has created very few positive changes in this week's CDN. Nonetheless, the number of discounted offers to sell coins has increased, thus, several issues are showing signs of weakness. While the market may be very active at these two shows, it would be a very good idea to check prices thoroughly before committing new funds.

One of the problems that occurs in this type of market, is that Bids may not actually fluctuate as much as they may be perceived. One week, four or five marketmakers may be Bidding \$475 to \$500 for a specific issue, then they may disappear from the marketplace due to travelling, show attendance, activity in the office or shop, or a host of other reasons relating to time limitations. Thus, the high Bidders may now be \$400 to \$425. The market appears to be down 20%. However, is the rare coin market designed to move that fast? When, in fact, part of the romance of numismatics is examining a coin at a thorough pace. Well, the market may be moving in a direction that limits the need for this time-consuming examination, yet, purists feel that buying and selling rare coins should be enjoyed like a stroll through the park on an autumn day; not passed from hand-to-hand, with no feeling, as if one were wearing boxing gloves. Many dealers may trade coins without looking, however, true numismatists long for the days of viewing, showing, making a choice, and then completing a deal that makes both parties happy.

One bright spot that many dealers may let pass unnoticed is that many of the sell prices being monitored on the trading networks are considerably higher than the Bid prices. This seems to be a characteristic of the non-generic coins--those coins which are not found in every dealer's showcase. For example, a Barber Quarter in MS-65, which is currently Bid at \$3500 may show under-bidders at only \$3000; yet, the cheapest Ask price that may be found is \$4000. On the one hand, this indicates that the \$3000 Bidders are not all that serious about locating a properly graded coin unless they can find it at a discount. They probably do not have ready buyers for this specimen. On the other hand, the potential seller at \$4000 is probably not in any hurry to move the coin and thus feels that the coin has potential at that level if a buyer becomes serious. This could very well change in the next few days if the potential sellers need to raise cash to cover auction bills which are coming due in the near future.

While so much attention has been given to the Dexter-Bareford 1804 Dollar of late, another 1804 Dollar has also been sold. The King of Siam Set recently changed hands for in excess of two million dollars. The set contains a Proof 1804 Dollar, along with a 1804 Proof \$10 Gold, Proof

\$2.50 and \$5 1834 Gold, and 1834 Half-Cent, Large Cent, Bust Dime, Bust Quarter, and Bust Half Dollar. The set was sold by Stack's to Martin Paul of the Rarities Group and Greg Holloway of Continental Investments. Sales like these will put the numismatic market on the investment "map", so to speak.

This Week's Market

CENTS: Talk about areas being slighted; BU Lincoln rolls are almost totally ignored. There are only a couple of buyers actively seeking rolls at this time. Furthermore, they want very few specific issues.

NICKELS: Very little trading is taking place for BU Buffalo or Jefferson Nickel rolls. Most buys being monitored are of the bargain-hunting variety, with the exception of the 1950-D which almost always has buyers at Bid.

DIMES: BU Roosevelt Dime rolls are mixed as several issues changed this week. Many dates, from 1946 to 1951, are lower as sellers drop their Ask prices. The issues which moved higher were later dates: 1954-S, 55-S, & 60-D.

QUARTERS: BU Washington Quarter rolls are also mixed this week. A couple of issues were lower, while the 1946-S, 47-S, and 56-D rolls were higher.

HALVES: All three Half Dollar series are steady at today's levels. The Franklin and Kennedy series have consistent buyers for most issues. Bidding in the Walker series is fairly sporadic.

DOLLARS: For the most part, the Dollar market is steady for better dates and rare dates. The only real problems in this area are the common date issues. In MS-63, 64, and 65 minus signs make these charts appear weak. If the common dates remain soft for a long period of time, it could pull the better issues lower also.

PROOF SETS and MINT SETS: Proof Sets are active at today's levels; there are just a few minuses this week. Mint Sets also remain steady with a couple of issues lower.

COMMEMORATIVES: The Commem market is trying to hold steady, however, a few minus signs appear in the charts. Most of the issues which have fallen are a result of lower sells, yet, most dealers are keeping their Ask prices well above Bid levels.

TYPE: The Type charts indicate a market which is teetering "on the brink" and isn't quite sure which way to go. It has been one of the most consistent areas of late and there are still numerous buyers at today's levels. If the ANA brings out more material than the buyers can handle, this series could suffer.

GOLD: The U.S. Gold chart indicates there are more sellers than buyers and at lower levels. Some of these issues are falling to levels which are lower than the Bids were prior to when this Bull market began.

EAGLES: American Proof Gold Eagles are wholesaling at: 1986 1 oz-\$405/\$421, 1987 1 oz-\$414/\$438, 1/2 oz-\$201/\$217, 1988 1 oz-\$645/\$680, 1/2 oz-\$295/\$315. Proof Silver Eagles trade at: 1986-\$26/\$27.50, 1987-\$19/\$21, 1988-\$48/\$52. BU 1986 Silver Eagles trade at \$11.80/\$12.20.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Date from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers

to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CDN to designate the exact quality of Brilliant Uncir-
culated coins.MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins
graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards
as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the
listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

ANA SPIRITED WITH ROBUST ATTENDANCE Common Issues Capitulate Slightly—Then Stabilize

The Market in Depth

If one considered whether prices were higher or lower as the main determinant of a successful show, then I am sure some dealers would feel that the ANA was less than successful. However, whether or not a show is successful is determined by many factors. Chief among these factors are whether dealers and the public participated at the show. Judging by the vast number of dealers, travelling numismatists (collectors), and Pittsburghers the ANA was a great success. Not only were they in attendance, they bought and sold coins in large numbers. (Many dealers who work for the collector, reported a lot of activity). Granted, prices may be lower for common issues and some selected better issues, but the fact remains that business was being done in a big way.

The Pittsburgh ANA Convention Committee put on one heck of a show! It was well organized from start to finish. From all the various meetings, educational forums, theatres, security, hotels, auction, and show location, all events went smoothly. This may have also been one of the biggest shows ever for numismatic related announcements or "news", in general. Photo Certified Institute (PCI), is a new grading service with their main thrust being that they will "slab" coins, which have a value of under \$100 for a fee of only \$10. Hallmark Grading Service is nearly ready to embark on their venture. They will label coins with a PQ designation (Premium Quality) for those high-end coins, and also will attribute collector coins. Both grading services are attempting to be comparable to PCGS and NGC in their grading philosophies. The marketplace will eventually determine how successful they are. PCGS also made an announcement of a new "improved" slab holder. It is thicker, containing a hologram and other security devices, such as barcoding.

The state of Pennsylvania is fighting a sales tax law on coins. New York and Texas recently won these fights, but it took a lot of support from the dealer and collecting community. There are now a minimum of twenty states which exempt rare coins or precious metals from state sales tax in some form or other. This may not seem like appropriate information on the pricing of coins, but it sure makes a difference to the dealers in these states when the state right next door doesn't charge sales tax.

The ANA Convention began on a slow note. Due to the fact that many of the nation's leading dealers were going to be away from their stores and offices for as long as twelve days, Bidding activity had stalled markedly. The sight-unseen market had come to a virtual standstill as the highest Bids were down as much as 50%. Yet, for this twelve day period, many dealers were trading the "old-fashioned way", by viewing the coins. And yes, coins were trading at or near today's levels. There are some minus signs throughout the charts, but these declines are a result of active trades at discounts. This can be viewed as a healthy sign and also a good buying opportunity for those who could purchase coins at the new lower levels.

Results from Bowers & Merena's ANA Convention sale, the Collection of Dr. Nelson Page Aspen, confirmed the general strength of the wider numismatic market. The sale, containing a generous offering of Worldwide coins and Ancients, realized \$5.4 million, with bidding activity that Q. David Bowers characterized as "Terrific!" Among the highlights of the U.S. offerings were a superb 1792 Half Disme in AU-50, realizing \$24,200; a prooflike uncirculated 1797 Half-dollar, O-101, brought \$99,000; a 1795 Draped Bust Dollar, Bolender-14 in MS-63, realized \$72,600; the 1829 Half Eagle, graded NGC-64, brought \$115,000; the 1858 Proof-63 Half Eagle realized \$57,200; a 1920-S Double Eagle, graded PCGS-63, brought \$41,800; and an 1880 Judd-1656 pattern dollar (Proof-65) in aluminum brought \$30,800.

This Week's Market

CENTS thru HALVES: The BU roll market was rather quiet this past week. This is not unusual when major shows take place; dealers try not to bring rolls with them as they are too cumbersome. A few of the 1982 and 83 clad rolls are higher (Roosevelts and Washingtons); while a couple of Franklin issues are lower (1955 and 1958-D). One Washington Quarter roll is noteworthy as the 1956-D is proving elusive and has moved up to \$80 Bid. This is interesting since it has surpassed the 1955-D roll at \$68.

DOLLARS: Since last week's CDN, the market for common MS-63, 64, and 65 Dollars had slipped slightly during the ANA. However, discounted sells could not be found so buyers responded by moving their Bids back up a little. This left the common issues unchanged. Nonetheless, other issues have fallen somewhat due to heavy inventoried positions by many dealers.

PROOF SETS and MINT SETS: These two areas of the market are quite stable at this time. There are several buyers of most issues at today's levels.

COMMEMORATIVES: Silver Commems have a considerable number of minus signs in the MS-64 and 65 columns. However, Gold Commems have really dropped off this week as Bids decline in MS-63, 64, and 65.

TYPE: The Type charts are filled with minus signs in all Mint State and Proof categories. Type was fairly active at ANA, but it was discounted which then made it attractive to buyers.

GOLD: U.S. Gold was being discounted drastically at ANA. This week's chart shows the results of these corrections.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz-\$407/\$425, 1987 1 oz-\$412/\$438, 1/2 oz-\$200/\$217, 1988 1 oz-\$645/\$680, 1/2 oz-\$295/\$315. Proof Silver Eagles wholesale at: 1986-\$26/\$27.50, 1987-\$19/\$21, 1988-\$49/\$54. BU 1986 Silver Eagles trade at \$11.80/\$12.25.

NOTE: Beginning with this issue, there will be a slight modification in the method of calculating the CDN: Certified Coin Market Indicator. Percentages listed for NCI and ANACS will only be changed the second week of each month, when the Monthly Summary and NCI/ANACS figures are released. This will temper the unwarranted appearance of volatility in these issues.

Coin Dealer Newsletter: Certified Coin Market Indicator™

SERVICE	LOW	HIGH	AVERAGE
PCGS	87.0%	120.5%	98.7%
NGC	90.2%	110.2%	98.4%
ANACS	94.3%	108.6%	98.4%
NCI	28.6%	61.3%	42.8%

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series and issues refer to July 1988 *Monthly Summary*.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market

closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

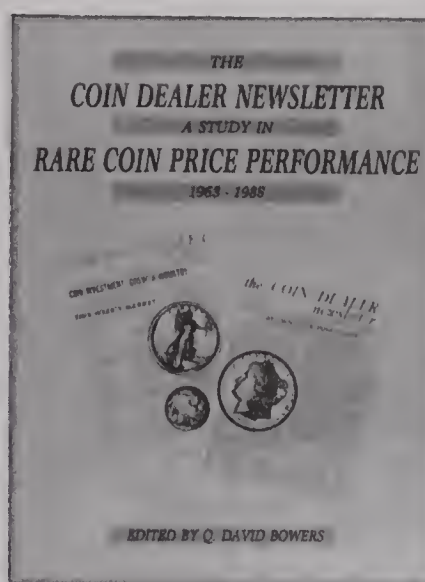

In addition, the volume contains market studies, articles, and commentaries by many of the best-

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

Before You Send Another Coin To Any Grading Service ...Check Out PCI And Some Of Our Guarantees!

- 1. We deliver your slab in 30 working days or less after receipt or **you don't pay.**
- 2. All coins submitted to PCI will be graded by 3 grading experts and a finalizer who have extensive experience in the rare coin business. You get a consensus grade.
- 3. All coins submitted to PCI will be examined and processed under confidential PCI procedures where no grader or finalizer knows the ownership of the items submitted or their declared values. Every submittal is private.
- 4. All PCI coins are technically graded and authenticated in accordance with, but not limited to, the standard published in the "American Numismatic Association Grading Guide." In addition, an application of internal PCI grading procedures and tests will be used to evaluate each coin.
- 5. Any purchaser or owner of a PCI coin who believes the coin is misgraded may resubmit the slab for a re-evaluation. If the coin grades differently it will be reslabbed to reflect the new grade. This resubmittal process of evaluation and/or reslabbing will be paid for by PCI (excluding return postage and insurance which you pay).

Vol. XXVII No. 34

August 25, 1989

Single copy price: \$3.50

BIDDING ACTIVITY INCREASES DESPITE LOWER BIDS

Common Dollars Move Higher; Appear Reasonable To Dealers

The Market in Depth

Bidding activity seems to be picking up slightly in some areas, yet, the strength of the newly reported Bids may be counterproductive to profits. Many dealers, some of which were vacant from the visible marketplace, are actively Bidding for coins in every area of the market. However, the majority of their Bids are at discounted levels. This is creating some minus signs as potential sellers are also lowering their asking prices in order to transact some business. The various dealers who are offering coins at discounts are trying to accomplish one of two objectives. They are either trying to improve their cash flow, or, they are attempting to create more trading activity by lowering levels to a point where they can attract buyers. In other words, drop specific issues to whatever levels they are actually worth.

One aspect of this current market which leads one to wonder where it is headed is the fact that many better or rare date coins are being offered at as much as 100% over the current Bid price. This seems to indicate one of two conclusions to be drawn. First, potential buyers remain conservative in their Bidding approach while they have large inventories and they are hoping to pick-off sellers who aren't aware of where the real market is (or, those sellers who need to raise cash). Secondly, the potential sellers could be holding out for what they feel the better-date coins are really worth. Even though the asking prices seem to be high, when a serious buyer is found, the buyer knows that he will have to pay over the Bid levels in order to obtain these specimens. Furthermore, the potential seller knows that he can always negotiate a lower price if he wants to consummate a deal, but it's a little difficult to raise your asking price when you already have it out there.

The large spreads may have a positive affect on the market as a whole, yet, the continual erosion of Bid levels on the more common coins has a more immediate affect on the values of inventories and day-to-day trading. The more Bids fall in a down market, the weaker Bids become until dealers feel that coins are too cheap relative to prior levels or other issues. Then, all of a sudden, dealers start buying at the cheap levels and values increase 20% to 30% almost overnight. At this point in time, however, it seems like dealer confidence in common issues is indifferent, at best (except for common Dollars in MS-64 and MS-65). If this indifference carries over for a very long period of time, then even the better-date coins will tend to fall as potential sellers deal with inventory imbalance.

This Week's Market

CENTS: Lincoln rolls continue to lack Bidder interest. The only changes

are to the downside for the 1960-D small date issue along with several proof issues from 1975-S to 1983-S.

NICKELS: In light trading, BU Jefferson rolls are mixed this week. The 1948-D and 49-D rolls are higher at \$35 Bid, while the 1945-P roll fell to \$170 and the 1948 roll dropped to \$11.

DIMES: BU rolls of Mercury and Roosevelt Dimes remain unchanged this week (with the exception of 1955-S, at a lower \$31 Bid) as activity in these two series was very sparse. The few notable Bids were mostly for specific issues and quantities, yet, seemed to be at bargain-hunting levels.

QUARTERS: BU Washington Quarter rolls are steady at today's levels with one major dealer continuing to list numerous offers to buy rolls at respective Bids. They will take various quantities of the dates listed. The 1942-S roll is now Bid at a higher \$2500.

HALVES: Most of the BU Franklin series is steady at current levels; the only issue showing an increase is the 1958-P, now at \$180 Bid. The majority of the Kennedy series is stable, however, a few of the Proof issues have retreated slightly.

DOLLARS: The Dollar market seems to be firming somewhat, despite the appearance of some minus signs. The issues which are down this week now represent levels at which dealers feel more comfortable. There are a large number of plus signs for common Dollars in MS-63, 64, and 65. MS-63 Prooflikes continue to march forward, although a few of the most common issues suffered slight setbacks.

PROOF SETS and MINT SETS: Changes are but a few this week in these two areas. Nonetheless, changes are to the upside, with the majority of remaining issues actively sought at today's levels.

COMMEMORATIVES: The Commemorative market seems to be one area which reveals an overabundance of available material. In many cases, coins are being discounted, rather heavily, so that buyers will be tempted. Generally speaking, this area seems to have dropped about 20% in the last few weeks.

TYPE: After last week's massive number of minus signs, this week's changes are just a "drop in the bucket" as Type coins continue to decline. There are a few increases for specific issues, however, the overall trend is lower.

GOLD: The U.S. Gold chart indicates several minus signs this week. However, there are a few bright spots, which lead dealers to believe a few buying opportunities do exist. The plus signs can be found in the twenties, both Libs and Saints. Even the issues with minus signs offer some hope as they fell only slightly (in most cases), thus firming up these issues.

EAGLES: American Proof Gold Eagles are trading at: 1986 1 oz-\$407/\$425, 1987 1 oz-\$414/\$426, 1/2 oz-\$200/\$217, 1988 1 oz-\$650/\$680, 1/2 oz-\$310/\$340. Proof Silver Eagles trade at: 1986-\$26/\$27.50, 1987-\$19/\$21, 1988-\$50/\$54. BU 1986 Silver Eagles wholesale at \$11.80/\$12.25.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 - Unc - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

In addition, the volume contains market studies, articles, and commentaries by many of the best-

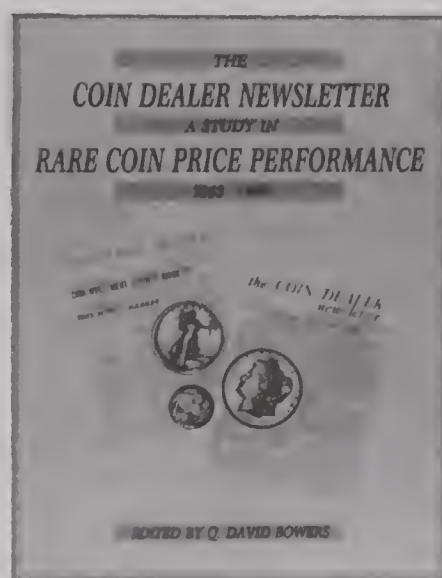

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find

that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

Before You Send Another Coin To Any Grading Service ...Check Out PCI And Some Of Our Guarantees!

1. We deliver your slab in 30 working days or less after receipt or **you don't pay.**
2. All coins submitted to PCI will be graded by 3 grading experts and a finalizer who have extensive experience in the rare coin business. You get a consensus grade.
3. All coins submitted to PCI will be examined and processed under confidential PCI procedures where no grader or finalizer knows the ownership of the items submitted or their declared values. Every submittal is private.
4. All PCI coins are technically graded and authenticated in accordance with, but not limited to, the standard published in the "American Numismatic Association Grading Guide." In addition, an application of internal PCI grading procedures and tests will be used to evaluate each coin. (ANA is a trademark name and is no way affiliated with PCI.)
5. Any purchaser or owner of a PCI coin who believes the coin is misgraded may resubmit the slab for a re-evaluation. If the coin grades differently it will be reslabbbed to reflect the new grade. This resubmittal process of evaluation and/or reslabbing will be paid for by PCI (excluding return postage and insurance which you pay).

BIDS WILTING UNDER SELLING PRESSURE Coins Trading Sight-Seen At Realistic Levels

The Market in Depth

Activity in the coin market continues steady, with most of the action taking place in the sight-seen market. Despite the large number of minus signs visible throughout the charts, the activity at these new levels indicates a healthy market. Coin prices may plus and minus, but if there is no market agreement on pricing, there will be no specimens trading hands. In other words, there will be no market. Active buying and selling keeps the coins and the currency in motion, insuring that people who want coins will be able to find people who want to sell coins.

Coin shows are again becoming the primary arena for market activity---which means that dealers who are serious about purchasing coins for their customers need to attend as many shows as possible. Of course, with the increase in dealer-to-dealer transactions at these shows, it means that sight-seen trading is of greater importance. This is obviously more beneficial to the client since this is the way he prefers to buy coins. It is in this type of market (bearish) that manifests the fact that viewing a coin is still the way that the collector or knowledgeable numismatist is better protected in the long run.

Collectors continue to devote a large portion of their attention (and dollars) to the multitude of auctions bringing new (or more accurately, very old) material into the marketplace. Upcoming are several sales which will be of specific interest to collectors. Stacks sale of September 7-8, held in conjunction with the Greater N.Y. Numismatic Convention, features a wide range of collector-oriented material, including a specialized collection of half-dollars. Especially strong in the Liberty Seated and early Walking Liberty material, many of the coins fall into the Uncirculated and better proof grades---with enough Gems present to attract any investor who wants to chase after quality. A nice representative selection, from colonials to currency, will bring the spirited Bidding that has characterized so many of these traditional numismatic offerings.

Bowers and Merena Auctions, working with Bank Leu, Ltd., is presenting an interesting New York sale, September 11-13. Three of the four sessions are devoted to U.S. material, with a nicely balanced offering of specialized and type coins. Rarities are certainly present: A Gem 1898 Gold Proof Set; a unique 1786 New Jersey Maris 10-oo; 1794 Dollar; and an uncirculated 1798 Quarter Eagle to enumerate a few. The number of high-quality lots spread across the entire spectrum of U.S. coinage (and no pun is intended with regard to the superb toning found on many of the coins being sold) guarantees that any serious collector will be able to come away from this sale with a few treasures. Session Four will attract a different collector audience---the Canadian specialist, with 400 lots of the finest that Canadian numismatics has to offer. With many of the lots being the finest known, the prices realized list should set the Canadian standards

for the coming year.

This Week's Market

CENTS: BU Lincoln rolls are a relatively stagnant market at this time. There are a couple of major Bidders looking for specific issues, however, they will not accept spotted rolls which are usually available. This is common sense.

NICKELS: The 1945-P war nickel roll has slipped a little further this week, now Bid at \$160. Other Jefferson rolls remain active such as the 1950-D at Bid and the 1948-D and 49-D rolls at higher Bids of \$38 each. The latter two rolls are being sought by one major dealer.

DIMES: BU rolls of Mercury Dimes are stable at current levels, although the same may not be said of the Roosevelt series. Several issues are lower including the 1948-D, 1951, 1952-S, and 1958-D rolls. These have been offered at discounted levels.

QUARTERS: BU Washington Quarter rolls are receiving a little activity, yet, most of the Bidding is at current levels. The one exception is the 1956-D roll which is now up to \$95---that's up \$40 in one month.

HALVES: Walkers and Franklins seem to be stable at current Bids, while Kennedys move higher. Several issues from 1974 to 1988 are rising as dealers try to stock rolls for Kennedy sets.

DOLLARS: The Dollar market looks like it might be stabilizing. This week finds only a few minus signs for issues which needed some corrections. Generally speaking, common dates are holding steady at today's levels and the number of buyers is on the increase.

PROOF SETS and MINT SETS: Both of these areas are steady at current Bids. Furthermore, a few sets in both charts are wanted at higher levels.

COMMEMORATIVES: Silver Commemoratives continue to lose ground in the MS-64 and 65 columns. Most dealers seem to be willing to turn their inventories at current levels. This is important in that it keeps the market active. Gold Commems are a little more stable at current levels. Potential sellers are not as willing to discount these specimens since their availability is somewhat limited.

TYPE: Type is still suffering through a large number of corrections to the downside. Active Bidders have lowered their buy prices on a major portion of these issues. However, there seems to be an active market at these new levels.

GOLD: Once again the U.S. Gold chart indicates numerous minus signs as marketmakers lower their Bids and potential sellers raise cash by discounting specific issues. Lower bullion continues to wreak havoc with the circulated market.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz-\$407/\$420, 1987 1 oz-\$412/\$430, 1/2 oz-\$197/\$215, 1988 1 oz-\$645/\$685, 1/2 oz-\$305/\$335. Proof Silver Eagles are trading at: 1986-\$26/\$27.50, 1987-\$19.50/\$21, 1988-\$52/\$55. BU 1986 Silver Eagles wholesale at \$11.80/\$12.25.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer to dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-65 PROOF-LIKE (GEM UNCIRCULATED PROOF-LIKE) will exhibit the same characteristics as the MS-65 - but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOF-LIKE (SUPER-6) will be 100% fully struck - and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 - MS-63. Any further qualifications, see Singles Page 4.

BU DOLLAR ROLLS

Put-together rolls will bring more or less depending on individual quality. Refer to Singles, Page 4.

MARKET ADJUSTMENTS CONTINUE Buying Opportunities Present In Most Series

The Market in Depth

Despite the fact that minus signs are still the norm within the CDN charts, the overall market appears to be balancing itself; or put another way, dealers are actively Bidding in a more competitive manner. The result of this renewed Bidding activity is that the minus signs, for all their numbers, are only nominal declines. Further good news might be that the number of minuses is less than the last several weeks, indicating that dealers feel the market is near a bottom in several series. Seeing the obvious strength in competitive Bidding has the additional effect of enticing more dealers to enter the Bidding arena, thus broadening the base for that particular series.

While looking at Commemorative prices in preparation for our Monthly Summary article on the Oregon and Arkansas series, we were reminded how well Commems reflect the current state of the market. Looking at the Bids for selected Commems both three years and three months ago, it seems certain that market volatility is still with us. Slabs, collectors, and dealers may all come and go, and coin prices will continue to adjust upwards/downwards according to the vagaries of supply/demand forces.

There are a few lessons here: the rarer coins and higher quality coins tend to do better; the higher a coin rises, the more room it has to fall, and above all, that the price of coins goes up & down. Select any random group of coins over time, and the results will probably be the same. This volatility is probably one of the first lessons that every collector learns, and one of the most important. The astute collector recognizes the buying opportunities implicit in market bottoms; unfortunately, the investor will sell out once he feels that a market peak has passed, exacerbating the pressure on prices by bringing additional specimens into a declining market. We know

how devastating minus signs can be on actual market behavior, even though they are superficially good news for coin buyers.

This Week's Market

CENTS: BU Lincoln rolls were somewhat active this past week as several Bids have changed. A couple of early issues declined slightly (1942-D, 46-D). However, several issues (1954, 55, 56-D, 57, 79, and 86-D) climbed higher.

NICKELS: A few BU Jefferson Nickel rolls moved higher this week, including some of the later issues. Those on want lists at higher levels are: 1952, 52-S, 56, 57, 84-D, 85-D, 86-D, 88, & 88-D.

DIMES: A couple of early Mercury Dime rolls are lower this week: The 1934-D (\$3600) and the 1938-S (\$2100). The rest of this series is unchanged. The Roosevelt series is quiet except for late-date issues. Three dates are higher: 1984-D, 85-D, and 86-D.

QUARTERS: The 1942-S Washington Quarter roll is now up to \$2600 Bid. Few if any have been traded. The rest of this series seems to be rather quiet.

HALVES: Walking Liberty Half rolls have a considerable number of adjustments to the downside. This is with respect to changes in this week's Monthly Summary. The Franklin series, along with the Kennedy series seems stable at the moment.

DOLLARS: Dollars are beginning to stabilize as Bidding activity picks up in this area. Very few minus signs can be found in the MS-63, 64, and 65 charts as many buying lists are competitive at current Bid levels.

PROOF SETS and MINT SETS: A few minus signs appear for late Proof Sets (1981-S to 1987-S). The 1988-S set is very strong at \$14.50. Mint Sets are mostly steady at current Bid levels.

COMMEMORATIVES: Commems appear to be about ready to do a turnaround as the number of minus signs is markedly down from the last several weeks. Bidding activity seems to be a little more consistent and discounted "sells" are not as plentiful at this time. Gold Commems are even showing a few plus signs as dealers look for specific issues at higher levels. They were not available at previous Bids.

TYPE: Even though the number of minus signs may still be excessive, many dealers feel that there are plenty of buying opportunities in the Type market. Many of the declines are minimal downward adjustments.

GOLD: Even the U.S. Gold chart is showing some strength; a couple of plus signs along with numerous issues remaining unchanged make this series a little brighter than it has been the last few weeks. Nevertheless, minus signs are still present for some of the available issues.

EAGLES: American Proof Gold Eagles trade at: 1986 1oz-\$403/\$417, 1987 1 oz-\$408/\$427, 1/2 oz-\$190/\$212, 1988 1 oz-\$650/\$685, 1/2 oz-\$310/\$340. Proof Silver Eagles are trading at: 1986-\$26/\$27.50, 1987-\$19.50/\$21, 1988-\$52/\$55. BU 1986 Silver Eagles wholesale at \$11.75/\$12.20.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CON to designate the exact quality of Brilliant Uncircu-
lated coinsMS-60 Unc. may not have full mint luster, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor bagmarks and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market

closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

In addition, the volume contains market studies, articles, and commentaries by many of the best-

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

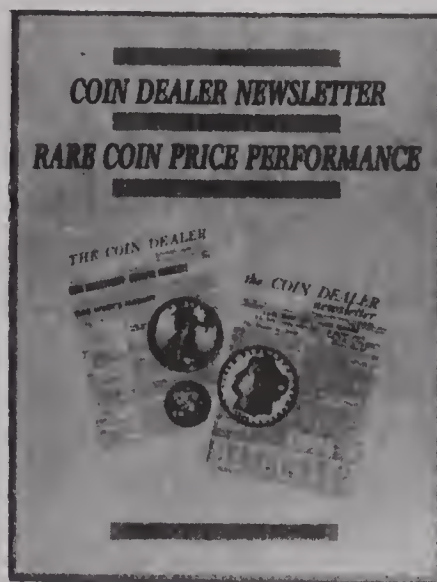

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find

that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

Photo-Certified Coin Institute (PCI), A Technical Grading Service Has A Dealer Network That Puts More Money In Your Pocket And Gives You Free Advertising.

Dear Dealer:

For months now you've been reading about PCI in all the major news publications. You saw us at the ANA and you'll see us at most all of the upcoming major shows in the future. And until just recently we had no dealer network...and no reason to have one.

But now, the National Numismatic Network may soon be operational and to be traded on it, PCI needs 100,000 coin slabs on the market.

To get these, PCI is forming a dealer network of 100 charter members who will agree to actively trade PCI coins and who will submit approximately 80 coins a month to be slabbed. In exchange, charter member fees will be rebated \$4 per coin, down to \$14 (for coins over \$100) although our \$10 fee (coins under \$100) will remain the same. PCI will also list your name, company, address, and specialties in every package that gets slabbed and sent out. This will be thousands of new client possibilities. In addition, PCI is now placing a multitude of ads listing all dealers who will market our coin slabs. All in all...we want you and are willing to go the second mile to get your business. If you want to increase your profits or feel a more economical approach to slab fees and turn-around time is for you...then fill out the application below and send it in. If you're in Chattanooga...call us and make a visit to see what you're missing.

There are no fees to become a PCI dealer...even a phone call to us is free.

If you have questions or comments call me or Ms. Adrian Pitt at 1-800-277-COIN. For you Facts dealers, direct me at station E-11.

Sincerely,

Lewis Revels
Advertising Director

P.S. Sign up now for the charter membership of PCI grading service and get your money and slabbed coins faster than ever before.

MARKET DECLINES CREATE FUTURE POSSIBILITIES Buyers Pick and Choose Specific Issues

The Market in Depth

Over the past several weeks, the overall market has seen a general decline in Bid levels. This has been due to many factors, not the least of which has been the lowering of buy prices by the nation's marketmakers. Inasmuch as this downturn has caused other dealers to also become sellers of material at discounted levels, the number of declines has proliferated. However, as significant as the minus signs are in reflecting a negative mood in the marketplace, there are many astute dealers (and their clients) who are buying coins which they feel are reasonable at today's levels; for that matter, they are willing to pay over Bid levels---they just don't want others to know what these issues are. They would rather have these coins offered to them rather than offer to buy them. Their reasoning is quite obvious since sellers usually want more for their coins when they know a potential buyer is looking for specific issues. These are customarily coins which the dealers perceive as being a reliable purchase due to low mintage, quality, low-availability, or all three factors.

Generally speaking, every series has coins that fall into this category. Most dealers have what they call a private want list. This list is derived from their many years of experience in the coin business and it is this expertise that separates the knowledgeable coin dealer from the "new breed" dealer. The new breed dealer may be one who successfully trades coins in slabs yet knows little about rare coins. He trades generic coins at common price levels even if some of the coins he trades are considered better dates. Knowing this information helps differentiate the coin expert (numismatist) from the coin trader. In this type of market, it helps to have an edge over the competition; in this type of market, this can sometimes separate the buyers from the sellers.

Stack's September 7-8 auction, held in conjunction with the Greater New York Numismatic Convention, demonstrated the continuing strength of the collector market. The 1685 lots yielded \$2.2 million, yet few could be characterized as "powerhouses". Excepting the Pan-Pac Octagonal \$50 (realizing \$41,250) and 1889 CC Morgan Dollar in Ch BU (@ \$24,750) the sale was almost entirely composed of high quality specimens of collector coins: most sold for less than \$1,000; many more sold under \$5,000; and even the bulk of the highlights were under \$15,000. These are the market ranges that collectors dominate. Included in the higher dollar prices realized were several complete sets of coins, including a 142 set of Commemoratives, Shield nickels, and Three-cent nickels. Among the highlights:

Denomination	Cataloguer's Grade	Price Realized
1866 5¢	Ch Br Pr	\$ 8,250
1868-S 50¢	Gem BU	\$17,600
1921-S 50¢	BU, Sharp strike	\$11,550
1837 NS Half-dime	Gem BU	\$ 7,700

This Week's Market

CENTS: While a few of the later memorial rolls are being sought at current levels, the majority of BU Lincoln rolls lack any real intensity. The major portion of Bids being monitored are of the bargain-hunting variety.

NICKELS: Some of the activity found in the BU Jefferson Nickel chart is on a higher level. The 1952, 52-S, and 53-S rolls are up to \$22, \$19, and \$9, respectively. However, the 1945-P, wartime roll, has slipped lower to \$150 Bid.

DIMES: Both Dime series, Mercury and Roosevelt, saw very little action this past week. Consequently, this chart remains unchanged.

QUARTERS: Like the dime series, BU rolls of Washington Quarters were also quiet. A few late-date issues were higher and the 1956-D roll lost a little on the "Ask" side, however, the majority of these issues are status quo.

HALVES: Walkers and Franklins appear stable at current levels; the Kennedy series is finding a little weakness among some of its issues. A few of the 40% silver rolls, 1965 to 69, have minus signs as potential sellers offer these issues at a discount.

DOLLARS: I would like to report that the Dollar market is beginning to lead the rest of the coin market out of the doldrums, but that might be a contradictory observation. There seems to be very little strength in the Bids of most dealers, including the market leaders. Nonetheless, this is one of the areas mentioned in "The Market in Depth" section, where knowledgeable dealers are quietly trying to pick-off those elusive better-dates.

PROOF SETS and MINT SETS: Numerous dealers actively participate in these two areas of the market. Most dates are in demand at current levels at all times. The only time sets are discounted are usually miscellaneous small lots of mixed dates; and even then, the seller usually wants Bid.

COMMEMORATIVES: The Commemseries continues to suffer from discounted offers to sell. However, this practice is definitely slowing down. As the softer issues fall in price, they are becoming more attractive to buyers. Some issues are beginning to firm. The Gold issues do not see much, if any, discounting in MS-63 and above.

TYPE: The Type market remains soft as the most common issues are on sell lists. Nonetheless, this is another area where astute buyers are searching for anything which can be classified as better than common.

GOLD: The Gold market continues soft, yet, a few issues are receiving some support. Several marketmakers are beginning to feel that this market may be near a bottom.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz - \$403/\$417, 1987 1 oz - \$412/\$427, 1/2 oz - \$194/\$210, 1988 1 oz - \$650/\$680, 1/2 oz - \$325/\$345. Proof Silver Eagles trade at: 1986 - \$26/\$27.50, 1987 - \$19.50/\$21, 1988 - \$51.50/\$54.50. BU 1986 Silver Eagles wholesale at \$11.50/\$12.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Thinking of selling?

Let Bowers and Merena get the best prices for you!

Right now we are accepting consignments for our upcoming auction season, with sales to be held in **California** and **New York City**. We offer you the following:

Experience: Of the top 10 world's coin records, we hold eight, including six of the top seven! We also hold the record for selling the three most valuable coin collections ever auctioned: (1) The \$25 million Garrett Collection for The Johns Hopkins University, (2) The \$20 million Norweb Collection, and (3) The \$12.4 million Eliasberg Collection of U.S. Gold Coins. Over a span of many years we have sold approximately \$200 million worth of coins for 10,000 consignors. Whether you have a group of coins worth \$2,000 (our minimum due to bookkeeping considerations) or \$25 million, you've come to the right place!

Expertise: Your coins and paper money will be catalogued by such well-known numismatists as Q. David Bowers, Dr. Richard Bagg, Michael Hodder, Raymond

Merena, Andrew W. Pollock, Mark R. Borckardt and Elizabeth Arlin, backed up by full, in-house facilities, including our Photography Department, our Graphics Department and others.

The result is a beautiful and authoritative catalogue that will highlight your numismatic material to its best advantage. Did you know that our catalogues have won more "Catalogue of the Year Award" honors, including 1988 and 1989 honors (given by the Numismatic Literary Guild), than have ALL of our competitors combined? There must be a reason!

Reasonable rates: For one low commission rate to you, the seller, plus a fee charged to the buyer, we handle EVERYTHING—from complete insurance starting the moment we acquire your coins, to cataloguing, to photography (of important pieces in full col-

or), to advertising and publicity—in other words, all you have to do is figure out what to do with our generous check!

Pleasurable Transaction: We offer you a pleasurable, enjoyable transaction. At Bowers and Merena, the entire team is on your side!

The First Step: Please contact Richard ("Rick") Bagg, Ph.D., or Ray Merena today—by COLLECT telephone call or use the coupon below. Have a question? We have the answers. We will take it from there. This may well be the most important financial move you've ever made!

■ Rick Bagg, Director of Auctions at Auctions by Bowers and Merena, Inc.

An expanded, improved *Certified Coin Dealer* newsletter. The "old" *Bluesheet* was already a great Value - which makes this the opportunity of the decade. We invite you to join in our continuing success.

If you think
we've only im-
proved the
Bluesheet,
Just wait until
you see what we
have planned
for the

AUCTIONS — STRONGEST SEGMENT OF MARKET

Type Market Revealing Some Positive Signs

The Market in Depth

While sight-unseen Bids continue to demonstrate restrained activity, Auctions continue to perform strongly. Bowers & Merena's Kissel & Victoria Collections sale realized \$4.6 million, with enthusiastic bidding from many of the same dealers and collectors who only days before had turned in a \$2.2 million performance at Stack's. Among the B & M highlights:

Denomination	Cataloguer's Grade	Price Realized
1786 NJ, Maris 10-oo	F-15 to VF-20	\$ 15,400
Roll 1972/72 cent	MS-64 to MS-65	\$ 8,800
1794 \$1	VF-20	\$ 14,300
1898 Gold Proof Set	Pr-65 & 66	\$264,000
1855 Gold \$, T. II	MS-65 to 66	\$ 39,600
1863 \$2-1/2	ANACS Pr-65	\$ 60,500

Bidders will need both deep pockets and endurance training to make it all the way through Superior Galleries' absolutely incredible Jascha Heifetz auction; all 4 days, 9 sessions, and 6197 lots of it. Being held October 1-4, the Heifetz Auction has a good shot at garnering the trophy for the largest individual auction sale of all time. The color plate section of the catalogue is alone worth the price of admission. In a sale of such monumental character, it seems almost redundant to say that it is particularly strong in this series or that denomination; it has strength throughout the American coinages. If we mentioned the wonderful session of California Gold, we would also have to mention the 440+ lots of Bust Half Dollars, and the incredible offering of National Bank notes and the seven California National Gold Bank Notes, and the Proof Eagles, and the Proof Seated Halves, and the hundreds of coins certified by PCGS and NGC. But to mention all the highlights would take too much space, so we won't even start. Oh, don't forget the 250+ patterns--they are nice enough to warrant a separate auction. Did I mention more than 4 dozen \$3 gold, many of them proofs? Matched by that many Territorial Gold pieces? And that not only quality is represented, but pedigree as well? Well, believe it.

Among our favorite highlights in the Heifetz sale are: the exceedingly rare 1867 with Rays Nickel in Proof-64; the 1796 Valentine-1 Half-Dime, MS-60; 1829 V-3 Half-Dime, Specimen Strike MS-64; the 1796 Bust Dime, MS-65; the pair of 1853 No-Arrows Dimes, MS-65; the 1875 Twenty Cent Cameo Proof-64; the 1805 Bust Quarter, Browning-2a in MS-65; the 1857-O Seated Quarter in MS-65; the 1918-S, 8/7 Standing Liberty Quarter in MS-64; the 1806 Bust Half, Knobbed 6, No Stem through claw, Overton-108 in VF-35 (often referred to among Overton collectors as the "1804" dollar of their series); the 1829 Overton-112 Bust Half Presentation Strike, MS-65; the 1834 Overton-106 Bust Half, NCG-Proof 63; the trio of 1795 Bust Dollars: Bolender-2 in MS-65, Bolender-13 in MS-60; and Bolender-14 in MS-66; the 1855-D Gold Dollar in MS-62; the 1808 Quarter Eagle in MS-60; the 1854-S Quarter Eagle, graded NGC F-12; the

1856 \$3 Gold, NGC Cameo Proof-64; either of the pair of 1879 \$4 Stellas; the 1802 2/1 Half-Eagle, MS-65; 1808 Half-Eagle, MS-64; the 1795 Breen 4¢ Eagle, MS-60; any of the other 16 pre-1838 Eagles; the pair of 1878 Proof Eagles, in 63 & 64; the 1907 Wire Edge in Gem Proof and Rolled Edge-Pe-riods PCGS-65 Eagles; the 1933 Eagle, PCGS-63; the 1861 \$20 PCGS-67; the Baker dozen of 1907 Hi-Relief Twenties; the 1858 Proof Set; the 1854 Calif-ornia Gold Dollar (BG-504) with "Humbert" reverse in Choice Unc; the 1792 Silver Half-Disme, Judd-7 ex-Garrett; the 1872 Amazonian Quarter, Judd-7 in Silver, PCGS-Pr-64; the 1879 "Schoolgirl" dollar, Judd 1609 in Copper, Proof-66; our favorite? the 1868 cased Proof Set in Aluminum. I suppose we could mention a few others, but we are content to realize that anyone who would be this excited over a list will be there to thrill in person.

This Week's Market

CENTS thru HALVES: Various changes can be noted throughout the BU Rolls charts. Mostly to the downside, the only positive issues are the Jefferson Nickels, with just a few pluses. Of significance is the fact that Kennedy Half dollar rolls, 1965 to 1969, are falling considerably.

DOLLARS: The Dollar market is fairly active, however, the common dates are trading at lower levels. MS-65 Morgans have fallen to \$300 Bid, while Peace Dollars have dropped to \$500. There are ready sellers at the Ask level

PROOF SETS and MINT SETS: A couple of minus signs keep these two charts from being untarnished. However, these are two of the most active areas of the market.

COMMEMORATIVES: Commemoratives continue to show weakness in many issues. A couple of weeks ago, they looked like they were beginning to stabilize, however, sellers are frequently monitored as they offer various issues at discounts.

TYPE: Minus signs are still the norm in the Type charts, although several areas are attracting various buyers. Inevitably, Type coins are the ones that seem to attract the bidders at major auctions. The potential buyers are looking for proportionally priced coins for the grade and they prefer issues which may be considered a little better than common.

GOLD: Mint State U.S. Gold is still being offered at discounted levels. As a result, numerous minus signs appear in the chart below. Most dealers do not feel comfortable with these high priced coins in their inventories, so they offer them at what they feel are very reasonable levels.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz - \$405/417, 1987 1 oz - \$412/\$428, 1/2 oz - \$195/\$212, 1988 1 oz - \$650/\$680, 1/2 oz - \$315/\$345. Proof Silver Eagles are trading at: 1986 - \$26/\$27.50, 1987 - \$19.50/\$21, 1988 - \$52/\$54.50. BU 1986 Silver Eagles wholesale at \$11.60/\$12.10.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific *CDN* Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to *CDN* Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). *Chert* reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to *CDN* as 100% base level. Data from latest issues of *CDN*, *Monthly Summary*, and *Certified Coin Dealer* newsletter. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-80 - Unc. - may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

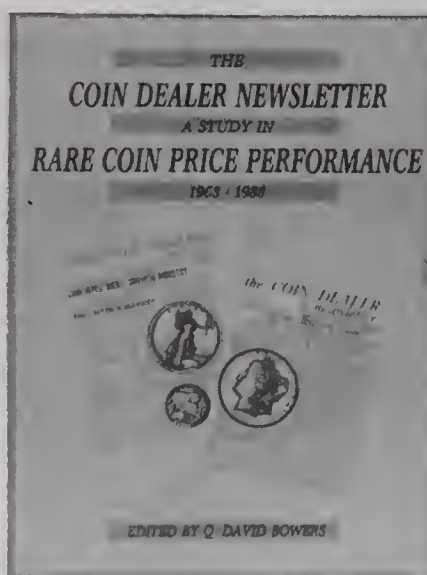

In addition, the volume contains market studies, articles, and commentaries by many of the best-

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

MARKET READYING FOR LONG BEACH, AUCTIONS

Bullion Uncharacteristically Higher Just Prior To Long Beach

The Market in Depth

The coin market is generally lower again this week due to the fact that most dealers are net sellers rather than strong bidders. This trend has continued for the past several weeks now with no end in sight. In fact, what began as your basic discounted bidding a few weeks ago, has turned into a "race-em backwards" contest. Dealers, who are trying to improve their cash positions, have been bidding so low that most potential sellers were not taking them serious (the bidders or the bids). However, this practice has asserted itself so convincingly over this period of time, that, in many cases, these lower Bids have now become the true market. Granted, this is mostly seen in the generic issues where availability is a strong suit, yet, as this trend persists, other areas are spiraling downward.

What is intensifying this situation even more is the fact that the usual marketmakers who normally support these markets with large inventories are now actively selling portions of their inventories to the high (low) bidders. No, they are not giving anything away as the sellers will not offer coins that are ridiculously bid at "steal them when they are not looking" levels. By selling coins at these discounted prices, the marketmakers are accomplishing two things: First, they are raising funds for future purchases, and secondly, they are keeping the market moving. As everybody knows, "a stagnant market is a dead market." In a dead market there are very few opportunities; dealers just sit and wait for something to happen. Coins don't sell and dealers can't afford to add to already stale inventories. So, despite the market moving down at a rapid pace, there is activity and buying opportunities.

What this market needs to turn it around is a new influx of money. And this would be a perfect time for it. With next week's Long Beach Convention at hand, there are bound to be more than the usual number of nice coins to purchase. Add to this the 6000+ lots from the Superior Sale and you have nearly all the ingredients for a successful west coast buying spree. Just bring money! What the dealers are bringing to this west coast swing are boxes of inventory and good attitudes about the direction the market is due to take at any moment now. With all the recent losses from previous bid levels, dealers are well aware of the fact that when the market does do a turnaround, prices are instantly up 20% to 30% overnight. An additional positive note may be seen in the bullion markets as gold and silver are both higher the week before Long Beach. This could change in a second, but dealers are accustomed to bullion dropping just prior to Long Beach, and if it should happen to continue in a positive manner, the dealers will jump all over this like flies on sugar.

This Week's Market

CENTS: With the overall market being what it is, one would not expect BU rolls to be very active either. This is definitely the case for the Lincoln series. The only change this week was for the better-date 1934-D roll; it fell to \$1100 Bid.

NICKELS: BU Jefferson rolls also saw a few dates slip lower. In the wartime series, the 1944-S and 45-S issues fell to \$200 and \$90, respectively. In addition, the 1950-P and 51-S rolls declined. Of a positive nature, the 1952-P and 52-S were higher.

DIMES: BU Mercury Dime rolls may be stable, but the Roosevelt series is weaker. Several issues, including the 1949-P roll (\$575 Bid), are down as dealers offer rolls at discounts of Bid.

QUARTERS: BU rolls of Washington Quarters did not see much movement this past week. The only reported change was found for the 1953-P roll, which fell to \$80 Bid. Many of the clad issues are still in strong demand at current levels.

HALVES: Walkers, Franklins, and Kennedys are the most stable and active of all BU rolls. The majority of dates are in demand at current levels. The only upward movement this week was found for the 1957-D and 61-D Franklin rolls, now Bid at \$125 and \$95, respectively.

DOLLARS: Despite the fact that the Dollar charts have an excessive amount of minus signs, it appears that the common dates may be close to the bottom. Last week the market fell below current Bid levels for MS-64 and 65 Morgans, but rebounded as dealers were unable to buy at these levels. Now Bids seem to be very steady at the \$105 (MS-64) and \$300 (MS-65) levels.

PROOF SETS and MINT SETS: Proof and Mint Sets continue to be as active as any area of the market. However, there is an added feature to these areas of the market. There are plus signs in the two charts as dealers actively try to buy sets at higher levels.

COMMEMORATIVES: To express that Commems suffered through a poor week may be an understatement. All grades indicate massive amounts of discounted offers to sell. In many cases, these discounts are as much as 25% as dealers attempt to reduce their inventories in this series.

TYPE: The Type charts indicate this weakness is widespread as almost every series has gone through these extreme reductions. Of course, if Bids had not jumped as much as they did, they probably would not be falling by as much as they are now. It is strange how there is very little visible support in the market, yet, major auctions continue to bring incredible prices realized.

GOLD: Mint State U.S. Gold continues to falter. Buy prices are being lowered each week by the major marketmakers, which causes other dealers to creep even lower. Many of these issues are nearing the levels they were at before this last bull market began.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz - \$414/\$434, 1987 1 oz - \$418/\$434, 1/2 oz - \$196/\$215, 1988 1 oz - \$650/\$680, 1/2 oz - \$315/\$345. Proof Silver Eagles are trading at: 1986 - \$26/\$27.50, 1987 - \$19.50/\$21, 1988 - \$52/\$57. BU 1986 Silver Eagles trade at \$11.25/\$12.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions
are used throughout the CDN to designate the exact quality of Brilliant Uncir-
culated coins.MS-60 - Unc. - may not have full mint luster, may be dull, toned, or spotted. May
be the worst possible example, but shows no wear or damage.MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not
be so dark as to hide any problems), will have minor blemishes and may show
weakness of strike. Above average coins.MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65.
Few contact marks in field, only minor marks on main devices. Full strike, with
eye-appeal. Attractive toning permissible.MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main
devices. Attractive toning permissible. A very tiny percentage of available BU
coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins
graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards
as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the
listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Get Set!

We're Nearly Ready to Go!

The entire rare coin community is talking about **HALLMARK GRADING SERVICE**, the connoisseur's grading service whose superb quality encasements (slabs) will soon be on the market.

If you are a dealer, being part of **HALLMARK GRADING SERVICE** promises to be profitable to you and, at the same time, build fine relationships with your clients.

HALLMARK offers more. It is a matter of record that Premium Quality coins sell for more money and sell faster than do "generic" or "sight unseen" coins. It is a matter of record that a rare die variety often sells for more, sometimes many multiples more, than an ordinary coin. Not all MS-63 or MS-64 or MS-65 or any other grade coins are precisely alike when it comes to market demand and market value. **HALLMARK** helps you and your clients realize the extra value your special coins deserve!

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

On the occasion of the twenty-fifth Anniversary of the *Greysheet*, We **EXPANDED** the *Bluesheet*!

The *Certified Coin Dealer newsletter* may only be in its fourth year, but it's never too early to make improvements. As part of the *Greysheet's* twenty-fifth anniversary celebration, the entire staff rededicated their efforts to serve our subscribers with the finest numismatic pricing information available. In the future, you will be seeing even more improvements in the CDN family of publications – not an easy job when you are already the market leader in providing accurate, unbiased, timely information.

In addition to the 543,004 prices *Bluesheet* subscribers now receive annually, we added:

Mint State Type Coins: expanded coverage, including nearly three dozen new listings, **all in seven grades:**

DEALERS ENCOURAGING LONG BEACH TURNAROUND Attendance Soars at Superior's Heifetz Sale

The Market in Depth

With all of the minus signs in the marketplace, it is a pleasure to report on one of the continuing highlights: Prooflike Dollars. These superior specimens (graded DMPL by PCGS and DPL by NGC) continue to remain collector favorites, which may not be coincidentally why they continue to exhibit strength sufficient to make the other series envious. There is no secret at all behind their continued rise week after week; it is simply a matter of two bidders posting modestly higher Bid prices every week in a continuing effort to purchase specimens. There may be a lesson in this for dealers who complain that Bids on their favorite series are dropping, but who aren't posting their Bids to help turn the movement around.

There was certainly growing activity at Mid-American Rare Coin Auctions' \$1.86 million 1989 San Diego Sale. Included among the highlights:

Denomination	Cataloguer's Grade	Price Realized
1909 VDB Cent	Matte Pr-65, R & B	\$ 3,740
1833 Bust Quarter	Pr-63	\$16,775
1807 Bust Half O-113	Ch Pr-63	\$ 4,620
1921-S W.L. Half	MS-64	\$12,100
1795 Bust Dollar	MS-63	\$31,900
1854-D \$1 Gold	MS-60	\$15,400
1795 Eagle, 9 leaves	AU-55	\$45,100

Superior Galleries reported exceptionally strong floor activity at the much-heralded Jascha Heifetz Sale. The nine-session extravaganza of 6197 lots started with two specialty segments devoted to California Gold and Bust Half Dollars---and the collectors of these beloved series responded enthusiastically. Not that there was any less excitement for the regular U.S. series that followed, but to the mind of many observers, the session that generated the most excitement was the incredible offering of Pattern coinage. Including multiple denominations of such old friends as the Washlady, Amazonian, and Schoolgirl designs, pattern specialists will long recall this one session as one of the all-time great pattern sales. Type coins, many of them certified, were selling well above their sight-unseen Bid levels---reflecting continued weakness in the Bid levels and not the desirability of high-quality coins.

Denomination	Cataloguer's Grade	Price Realized
1853 CA Gold 25¢ BG-218	AU	\$ 12,100
1854 CA Gold 50¢ BG-424	Unc	\$ 9,900
1918/17-S 25¢	MS-64	\$ 18,425
1806 Bust Half, KN 6, NS	VF-35	\$ 50,600
1806 Bust Half, O-109	PCGS-63	\$ 22,000
1806 Bust Half, O-110	AU-50	\$ 15,400
1921-S 50¢	MS-64	\$ 12,650
1795 Bust \$1, B-14	MS-66	\$231,000
1799 Bust \$1, B-12b	MS-67	\$198,000

1863 Seated \$1	MS-66	\$ 37,400
1879 Schoolgirl \$1, J-1609	Pr-66	\$ 44,000
1868 Aluminum Pr Set	Ch Pr	\$ 68,750

This Week's Market

CENTS: With the exception of a few issues, BU Lincoln rolls are relatively quiet. The changes which have occurred are generally downward. The issues with plus signs are the 1954-D & S, 1984-D, and 1986.

NICKELS: BU Jefferson rolls found very few changes this past week. The 1944-D is lower at \$270 Bid, while the 1957 is up to \$3.50. The rest of this market appears very subdued, including the late-date rolls.

DIMES: Week after week it seems like different rolls of Roosevelt Dimes are being offered at discounts. This week the 1948-D and 49-D rolls are lower at \$190 and \$270, respectively.

QUARTERS: BU Washington Quarter rolls prior to 1965 (silver issues) are unchanged this week, yet, there are still very few active Bidders in this area. Most dealers who may be interested are just waiting for discounted sellers.

HALVES: With the only minus in the Franklin series being the 1955 roll (\$160 Bid), the rest of this market remains solid. In fact, a few rolls are higher this week: 1957-P & D, and 1961-D. The Kennedy series also continues active at today's levels.

DOLLARS: Once again, the Dollar market exhibits a multitude of minuses in the MS-63, 64, and 65 charts. Sellers continue to outnumber buyers for the more readily available issues, while the better dates are drifting lower due to consistent lower Bidding (nobody is willing to take a leadership role). The bright spots here can be found in the Prooflike issues (63 & 65) as numerous plus signs fill these columns.

PROOF SETS and MINT SETS: Proof and Mint Sets remain very strong at current levels. There are several plus signs indicating some added strength.

COMMEMORATIVES: The Commem market is being severely tested. Minus signs continue to cover the MS-64 and 65 columns, as prices are driven lower. The most active Bidders remain at discounted levels.

TYPE: Although minus signs are still the primary indicator of this market, dealers feel this downturn is nearly over. Most dealers are looking for fresh coins; this is one reason why major auctions are doing so well. The Superior Sale is attracting many buyers at current levels and higher.

GOLD: The U.S. Gold chart appears to have stabilized this past week. There are several plus signs in the MS-63 and better columns as dealers feel various issues have gotten way too cheap. This will be an important area to watch at the Long Beach Show.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$415/\$430, 1987 1 oz-\$415/\$437, 1/2 oz-\$195/\$216, 1988 1 oz-\$645/\$680, 1/2 oz-\$315/\$345. Proof Silver Eagles trade at: 1986-\$26/\$27.50, 1987-\$19.50/\$21, 1988-\$53/\$56, 1989-\$24/\$26. BU 1986 Silver Eagles trade \$11.30/\$12.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific *CDN* Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to *CDN* Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to *CDN* as 100% base level. Data from latest issues of *CDN*, *Monthly Summary*, and *Certified Coin Dealer Newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CON to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Tampa Will Be a "FUN" Place in January!

The 1990 Florida United Numismatists Convention and Auction moves to Tampa this coming January. Once again, Mid-American Rare Coin Auctions, Inc. is the Official F.U.N. Auctioneer for this extremely popular annual numismatic extravaganza that traditionally attracts more attendees than any other numismatic convention. In recent years, the show attendance has averaged over 15,000!

The 1990 F.U.N. Auction will take place on January 5 and 6 and will feature an outstanding offering of numismatic properties. Our magnificent catalogue will include some of the finest graphics and photography imaginable.

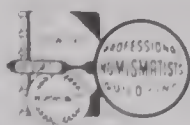

Now is the time to contact us regarding the placement of your holdings in this major sale. We can offer you extremely competitive commission rates, expert cataloguing, superb photography of all important lots, generous cash advances and so much more! A single, toll-free phone call to Tom Mulvaney or Dino Payne will bring you all the information you need to get your coins in this major sale. We will be happy to answer all your questions and work with you every step of the way to see that your consignment realizes its fullest potential in this very popular and well-attended sale. Be sure to ask about our PCGS Auction Express Service whereby your coins can be "Express

Graded" in time for the sale. This service alone could add thousands of dollars to the prices your coins realize.

Personalized Service and Results!

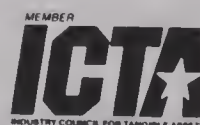

After you talk with us and experience the Mid-American "difference," you'll see why the vast majority of our consignors consign again and again. Please contact us soon; the deadline for receipt of consignments is October 31.

LONG BEACH BRINGS GLIMMER OF HOPE

Market Responds to Spotlight on Heifetz

The Market in Depth

The good news is that dealers at Long Beach couldn't wait to report that the show was not the bloodbath that so many predicted (or feared) it would be. The bad news, such as it was, was that even the most optimistic dealers had fairly low expectations. So what happened? There was a consensus of opinion among dealers that their Long Beach show was a solid success; perhaps not their best-ever Long Beach, mind you, but certainly better than anticipated. Considering the overall mood in the market of late, that is a lot more than most expected. Of course, activity was certainly encouraged by the emotional high carried over by dealers who had just spent the previous four days attending Superior's record setting \$16.3 million Heifetz auction.

Best news from the show was that success was reported by all sorts of dealers---wholesalers, retailers, high-value and low. Even our favorite table with antique watches seemed to be doing well. While no dealer with inventory wants to see lower coin prices, a good argument could be made that the current lowered Bids on rare coins, especially the generics, are bringing collectors back into the marketplace. Dealers who specialize in serving the collector reported brisk trading.

Dealers who came to buy wholesale likewise reported being able to spend as much as they desired on nice coins. There is nothing quite like a major show for being able to browse through the inventories of hundreds of dealers. And with cash flow being what it is, there was plenty of opportunity to make good buys.

Overall, generic values held generally steady at Long Beach, with active trading at those levels. Various silver type issues were trading at or above Bid if it met the buyer's grading criteria; the exact percentage above Bid seems to be largely determined by finding the dealer who had both cash and desire. Gold type at the show showed some upward movement due to the pressure of plus signs. There was some upward pressure on the higher-grade certified coins as a result of the active Bidding at the Heifetz sale.

Despite the absence of so many dealers from their offices for so long (due to the Superior sale, Long Beach and travel time), Bids are holding up remarkably well. There are lots of plus signs in the U.S. Gold chart. There are fewer minuses this week than we have seen the last several, and even fewer substantial drops. Hopefully this will be viewed as a positive note and encourage additional Bidding. Something had to get the ball rolling, and nothing like a good Long Beach to keep it moving.

This Week's Market

CENTS: BU rolls were largely ignored this past week and as a result, Lincoln Cents are unchanged. When a major show occurs, roll activity

usually slows since most dealers choose not to carry the added weight.

NICKELS: Only a couple of minor changes occurred in the Jefferson Nickel column. The 1944-D is lower at \$260 Bid and the 1948-D fell to \$37 per roll.

DIMES: Silver issues of the Roosevelt Dime series are still sluggish as dealers would rather sell than buy at current levels. The 1948 roll dropped to \$240 Bid, while the 1949 roll declined to \$550.

QUARTERS: Activity in the Washington series was hardly noticeable. Very little meaningful information was monitored this past week resulting in no changes. This is another series where most dealers who are interested in buying rolls just sit back and wait for potential sellers to offer “deals” at discounts of Bid. There is, however, one major buyer of various dates who will pay current Bids.

HALVES: BU rolls of Franklins and Kennedys are the exceptions to the stagnant roll market. Franklins show considerable Bidding activity at current levels, with several issues wanted at higher levels. Most Kennedy rolls are also active at today's levels, with many showing plus signs.

DOLLARS: It seems like the Dollar market is beginning to firm up slightly.

Many dealers reported active sales at Long Beach; they feel many issues are nearing reasonable price ranges. Despite this fact, there are still scattered minus signs throughout the columns. These are issues where Bidding is taking place at substantially lower levels.

PROOF SETS and MINT SETS: Activity is constant in these two areas. Several Bidders will take large quantities of most dates. In addition, when mixed lots are offered for sale, they are usually claimed rather quickly.

COMMEMORATIVES: The Commem market is beginning to turn around.

Fewer minus signs are present (mostly in the 65 column), and, in fact, several plus signs are appearing. Gold Commems seem to be steady at current levels.

TYPE: Although the Type market still has a smattering of minus signs, many dealers became more aggressive at Long Beach. And despite the lower Bid levels, coins were actively trading at these new levels. Various issues did respond to buying pressure as Bids rose.

GOLD: U.S. Gold exhibited some real strength at Long Beach. Marketmakers adjusted their Bid levels as a result; this is confirmed in the U.S. Gold chart as plus signs are scattered throughout MS-63, 64, and 65. Many dealers feel this area is now on its way back!

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$413/\$423, 1987 1 oz - \$417/\$435, 1/2 oz - \$200/\$210, 1988 1 oz - \$645/\$675, 1/2 oz - \$315/\$345, 1989 1 oz - \$615/\$685, 1/2 oz - \$295/\$338. Proof Silver Eagles trade at: 1986 - \$26/\$27.50, 1987 - \$19.50/\$21, 1988- \$54/\$58.50, 1989 - \$24/\$26.75. BU 1986 Silver Eagles trade at \$11.20/\$11.80.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Hallmark Is Ready!

The entire rare coin community is talking about **HALLMARK GRADING SERVICE**, the connoisseur's grading service whose superb quality encasements (slabs) are now coming on the market.

If you are a dealer, being part of **HALLMARK GRADING SERVICE** promises to be profitable to you and, at the same time, build fine relationships with your clients.

HALLMARK offers more. It is a matter of record that Premium Quality coins sell for more money and sell faster than do "generic" or "sight unseen" coins. It is a matter of record that a rare die variety often sells for more, sometimes many multiples more, than an ordinary coin. Not all MS-63 or MS-64 or MS-65 or any other grade coins are precisely alike when it comes to market demand and market value. **HALLMARK** helps you and your clients realize the extra value your special coins deserve!

Want to know more? Use the convenient coupon below.

COLLECTORS who demand quality encapsulation for their quality coins will find that the Hallmark Grading Service offers many extra advantages.

SDICA's Pre-Halloween Presentation

(* with not-so-scary prices !)

SDICA is rolling back the clock almost 10 years on US gold coin prices. In fact, the prices on many mint State US gold coins haven't been this reasonable in almost a decade.

We are offering the clients of the Coin Dealer Newsletter a special deal on choice, glittering, hand-picked US gold coins just as they left their respective Mint Bags. (Some well over 100 years ago.!))

Many of these sought after little darlings haven't seen the light of day for decades and some have been stored in Europe behind steel doors since you were a gleam in Mom's eye.

All are original Mint State specimens with nice original color and this scribe is of the opinion that these coins will almost certainly rise in value as the years pass.

Who could possibly argue that a nice \$5.00 or \$10.00 gold piece wouldn't bring excitement to a novice yet to be introduced into a hobby that will surely last a lifetime.

As the fall changes to winter the tens of thousands of collectors and investors begin their annual pilgrimage indoors and that means the fascinating business of buying and selling coins truly reaches its full bloom within the months ahead.

In case you've been trout fishing in Nova Scotia the last few months and missed the news, the price of gold is down and as most nuclear physicists realize that is the time to buy.

So we have stocked up on some really nice choice certified and slabbed US Mint State Gold and we suggest you look over our list at your convenience and then wipe out every savings account, charge card and cookie jar you have and squirrel some of these investment gold coins away.

Seize the moment.

MS-65 PROOF LIKE (GEM UNCIRCULATED PROOF LIKE) WILL exhibit the same characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOF LIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 MS-63. Any further qualifications, see Singles Page 4.

BU DOLLAR ROLLS

Put-together rolls will bring more or less depending on individual quality. Refer to Singles, Page 4.

Vol. XXVII No. 42

October 20, 1989

Single copy price: \$3.50

MARKET CONTINUES STABLE No News Is Very Good News

The Market in Depth

"Today's coin forecast is for continued mildness with a 40% chance of a slight increase?" Well, as you all know, the Coin Dealer Newsletter is not in the forecasting business. In fact, we don't even waste our time in the office making 'internal' guesses on market direction; even though all the information we get from so many sources makes our crystal ball a little clearer than some, its not enough to make it more than an exercise in good guessing. The problem is, the question of future market direction seems to be on everyone's mind right now. The first five months of 1989 were all up---no problems predicting there. Between the June and October Long Beach shows, the market was mainly downhill---while this created 'problems', they were problems of inventory valuation rather than guessing direction.

The market showed itself fairly stable at the recent Long Beach, and is continuing to do so; ignoring the volume of plus or minus signs created by slight movements in the price of generics, the market looks to be steady. Most of the minuses are still coming from discounted sells. In fact, we are still seeing the problem of "crossovers", the name the CDN staff has given to the situation when one teletype service will show a sell message at a lower price than one of the other services will show a buy message. These naturally present a problem to us, since we need to figure out what the coin is worth to straighten out the universe. Granted, the numismatic market is not nearly as efficient as many would like you to believe, but it really shouldn't be that inefficient. Telephoning both parties usually straightens out the confusion and gives us a good indication of where the market really is.

In the compilation of this weeks CDN: Certified Coin Market Indicator, we were struck by an interesting statistic. For internal use, we maintain an index of value on the CDN side relative to the first Indicator values of the year; in other words, we find it modestly useful to see at a glance that our basket of 65 coins (and series) is up 20% since January (for the exact coins and series we follow, please refer to the July 1988 Monthly Summary). This month marks the retreat of our index below the levels of January 1---we won't tell you just how high it had risen, because nobody needs bad news this early in the morning.

All this is by way of explaining our surprise at the Indicator area that is currently the highest relative to its 1989 start, and I can tell you that it wasn't among our top three guesses. Uncirculated Type in MS-64 is still up 25% from where it started. After we got over our initial surprise, we were quite pleased. We periodically extol the virtues of MS-63 and MS-64 coins as being a fabulous 'buy' for the money, since in most cases you are getting the same quality as the MS-65s that defined a "serious" collection in the good old days. In fact, the 'lower' grade partner did better in seven of the ten broad areas we track. Maybe the collectors do know something . . .

This Week's Market

CENTS: The BU Lincoln market saw a little more activity than normal this past week. However, the majority of the changes are to the downside. The lone exception is the 1940 roll, which is up to \$29 Bid.

NICKELS: BU Buffalo and Jefferson Nickel rolls appear dormant for the time being. Nonetheless, what you can't see due to the lack of Bid changes, is the activity at current levels. Several dates are in demand in the 40's, along with the 1950-D.

DIMES: Bidders for BU Roosevelt Dimes remain less than enthusiastic at current levels. As a result of discounted "sells", a handful of issues are lower: 1951-D, 1952, 1955-D, 1955-S, and 1956.

QUARTERS: BU rolls of Silver Washington Quarters were mixed this past week as a few issues were higher, while just a couple were lower. The 1941-S, 42-S, and 43-S rolls all moved higher as one strong buyer is looking for these dates. Numerous rolls of clad quarters are also in demand at higher levels.

HALVES: Common rolls of BU Walkers fell slightly this past week as sellers were active at discounts. The Franklin series continues strong for most issues; there are several plus signs and only one minus (1949-D). Most of the other issues are steady at today's levels. Kennedy's remain stable at current levels.

DOLLARS: The Dollar market appears to be on the upswing. Numerous plus signs appear in the MS-63, 64, and 65 columns denoting a significant turnaround. Nevertheless, some minuses appear as a result of market adjustments as Bidders attempt to buy at lower levels. Prooflike Dollars are very strong, especially in 63.

PROOF SETS and MINT SETS: Although minus signs are prevalent in the Proof Set columns, this area is active at today's levels. Mint Sets are also active, some at higher levels.

COMMEMORATIVES: For those readers who follow the Commem market and believe it to be a gauge of the overall market, you may be pleasantly surprised at all the plus signs in this week's chart. There are still some minuses, but it now appears to be a much healthier market.

TYPE: The Type charts are full of plus signs, thus showing renewed strength. This may be a result of the strong showing at recent auctions, or, dealers may be anticipating another massive "Wall Street" fund (which may be just around the corner).

GOLD: The U.S. Gold chart is covered with pluses as marketmakers take advantage of low levels. As we have stated in the past, when the market turns around it becomes extremely difficult to buy coins at current Bids.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$413/\$428, 1987 1 oz-\$414/\$434, 1/2 oz-\$195/\$213, 1988 1 oz-\$640/\$675, 1/2 oz-\$315/\$345, 1989 1 oz-\$620/NA, 1/2 oz-\$295/NA. Proof Silver Eagles trade at: 1986-\$26/\$27, 1987-\$19.50/\$20.50, 1988-\$58/\$65, 1989-\$36/\$39. BU 1986 Silver Eagles trade at \$11/\$11.75.

Coin Dealer Newsletter: Certified Coin Market Indicator™

SERVICE	LOW	HIGH	AVERAGE	A weekly comparison of ratios of certified coin Bid levels relative to <i>CDN</i> Bid levels (es 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest end highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to <i>CDN</i> as 100% base level. Data from latest issues of <i>CDN</i> , <i>Monthly Summary</i> , and <i>Certified Coin Dealer newsletter</i> . For specific certified Bid levels, please refer to <i>CCDn</i> . Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series end issues refer to July 1988 <i>Monthly Summary</i> .
PCGS	87.7%	120.5%	100.6%	
NGC	91.4%	103.2%	97.2%	
ANACS	93.4%	116.7%	100.4%	
NCI	31.8%	62.9%	46.5%	
Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific <i>CDN</i> Bids in order to determine current market for certified coins.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end ewey nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

When it comes to rare coin investments . . .

Anyone can tell you what they'll do for you in the Future.
First, though, I'd like to tell you what I've Already done!

Rare coins have been the number one investment performer for as long as I've been involved in coins — for a quarter of a century.

In that time, many rare coin dealers have come and gone; many bull and bear markets have come and gone.

In that time, my business has grown and my customers have prospered.

Why? I'll let them tell you.

- "I trust William Spears' integrity and ability to find me the best value for my money. I have doubled my money in the short time I've been investing with him."

— A Western Washington businesswoman

- "Bill got us interested in investment quality silver dollars three years ago. The bottom line has been a 300% increase in the value of our coins."

— Pacific Northwest convenience stores owners

- "It has always been a satisfying experience doing business with Bill. He has always come through whether it was the acquisition or liquidation of investment grade coins. Quality coins plus a quality dealer equals Bill Spears."

— Northern California coin collector / Investor

- "Since Bill has been handling my numismatic investments, he has continuously improved my portfolio holdings with the finest quality available. He has provided the utmost in service and dependability and has proven to be a trustworthy and knowledgeable rare coin investment specialist."

— A prominent Puget Sound Area Surgeon

The success of my customers has come from an investment philosophy I have followed for many years:

Buy the Best!

I have specialized in **top-grade** silver dollars, Walking Liberty half dollars, commemorative coins, and rare gold — the key areas of investment return because of their popularity, demand, liquidity, and collector base.

PCGS Authorized Dealer

While past performance is no assurance of future growth, there is a new dimension to the security of rare coin investment that did not previously exist. In February of 1986, the Professional Coin Grading Service (PCGS) was born. This service provides improved liquidity, **guaranteed** grading accuracy and authenticity.

All of the coins sold in **PCGS** holders will be purchased sight unseen by **PCGS** dealers who make markets in these coins.

PCGS currently has about 100 authorized dealers, and the network is growing rapidly (there are over 400 dealer / applicants.)

As an **authorized PCGS dealer**, I will be able to serve more customers than ever before. I would like to serve **you**.

I now deal exclusively in **PCGS** coins. I offer investment portfolios from \$500 to over \$250,000.

Personal Service

I provide personal service, and I mean **personal**. I handle every account, talk to every customer, provide liquid cash markets, offer advice on both buying and selling, and employ no salesmen.

Besides being an authorized **PCGS** dealer, I am also a member of the American Numismatic Association (ANA), the Pacific Northwest Coin Dealers Association, the U.S. Commemorative Society, and other leading numismatic organizations.

My office hours are 10:00 a.m. to 6:00 p.m., Monday through Friday.

All inquiries and transactions are confidential.

MARKET SOARS AS DEALERS INCREASE BIDS Dollars, Commems, Type, And Gold Lead Activity

The Market in Depth

Whether it is a matter of boosted confidence in rare coins or a lack of psychological confidence in the economy, many dealers report that their customers are showing renewed interest in buying coins at today's levels in anticipation that they will be elevated to higher levels. Numerous dealers are advancing their Bids in many series as they attempt to buy coins for their customers prior to any substantial market expansion. The Long Beach Show was a positive turn in the market for most dealers as prices stabilized, and in fact, rose slightly.

In addition, the record-breaking Superior Sale served to reemphasize the fact that collectors, as well as investors, are interested in fresh material which has not been shopped all over the country. This, in fact, is the main problem with dealer inventories: The coins which remain in inventory for a long period of time become almost "shop worn" in appearance. They may be virtually the same issues which other dealers are also carrying in their boxes; and furthermore, these may be coins which are graded on the low-end of the spectrum. In other words, these may be less-than desirable examples which keep the entire market from edging forward.

The areas which are setting a blistering pace are Dollars, Commems, Gold and Type. Within each of these series are specific issues which are in demand at increasingly higher percentages over the previous week's listed Bids. Meaning, dealers are not just outbidding the previous high Bid by a small margin, they are raising the previous Bid by a considerable amount. And it is not just the rare coins that they are chasing after. Granted, they may not be looking for the most common issues, however, they are not looking to buy just the low-mintage or low-population coins either, although they would gladly buy them if offered.

Last week saw a continuance of strong bidding activity at major auctions. Stack's conducted their latest sale at the Omni Park Central Hotel, in New York City. Collector coins seem to be receiving the most attention as the sale realized over \$3.4 million. Among the highlights were:

Denomination	Cataloguer's Grade	Price Realized
1793 Wreath Cent	MS-65	\$ 49,500
1800 Half Dime LIBEKTY	Ch BU	\$ 28,600
1794 Half Dollar O. 101	Ch BU	\$137,500
1866 Seated Dollar W/M	Gem BU	\$ 57,750
1893-S Morgan Dollar	Ch BU	\$ 66,000
1904 Lewis & Clark	Ch BU	\$ 30,250
1652 New England Shilling	VF	\$ 24,200

This Week's Market

CENTS: After last week's limited number of changes, the BU Lincoln rolls'

chart has reverted back to a docile trend. This week found very little trading on the teletypes.

NICKELS: The Buffalo series is relatively silent, however, when original rolls are offered they usually sell quickly at current levels. The Jefferson Nickel series saw light trading this past week; buyers were usually at or near the current Bid levels. The lone exception was the 1938-D, which fell to \$120 Bid.

DIMES: BU rolls of Mercury Dimes were stable this week, while the Roosevelt chart would seem to indicate the same. Nonetheless, this series is still sluggish as most offers to sell need to be discounted before they attract buyers.

QUARTERS: The Washington series is still mixed as one or two major buyers are looking for several issues at the current Bid levels. There are, however, a few dates which have been offered at discounts: The 1942-D (now Bid at \$400) and the 1956-D (\$90).

HALVES: Most Franklin issues continue to command the current Bid levels. The only issues moving lower were the 1963-P & D rolls. On the plus side were the 1954-P and the 1957-D rolls.

DOLLARS: The Dollar market has caught fire. Many issues in MS-63 and higher are revealing plus signs; and those are good signs for the entire market. Several Prooflike issues continue to increase as several Bidders need coins for clients.

PROOF SETS and MINT SETS: Even though Proof and Mint Sets remain on many want lists and continue to be active, it seems like some issues are beginning to weaken. This is evidenced by the increased number of minus signs in this week's charts.

COMMEMORATIVES: The Commem market is taking on an air of excitement again. Many dealers are adding specific issues to their want lists, and they are willing to pay over the previous low levels. In fact, the chart reveals nearly all plus signs of the numerous changes made this week.

TYPE: Type coins are becoming very active as dealers are on the prowl for almost every issue. Even the issues without plus signs are in demand at current levels. With all this Bidding activity, many dealers feel that the rest of the year will be optimistic.

GOLD: The Gold chart reveals just as much optimism as the other charts. The MS-63 and better quality issues are very strong; many have increased as much as 10%-20% this past week alone.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz - \$412/\$426, 1987 1 oz - \$416/\$436, 1/2 oz - \$195/\$213, 1988 1 oz - \$640/\$675, 1/2 oz - \$315/\$345, 1989 1 oz - \$625/NA, 1/2 oz - \$295/NA. Proof Silver Eagles trade at: 1986 - \$26/\$27.75, 1987 - \$19/\$21, 1988 - \$61/\$68, 1989 - \$43/\$48. BU 1986 Silver Eagles trade at \$11/\$11.75.

Coin Dealer Newsletter: Certified Coin Market Indicator™

SERVICE	LOW	HIGH	AVERAGE
PCGS	88.6%	120.5%	101.7%
NGC	91.4%	104.1%	97.5%
ANACS	93.4%	116.7%	100.4%
NCI	31.8%	62.9%	46.5%

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer Newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series and issues refer to July 1988 *Monthly Summary*.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 Choice BU Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 Distinct BU Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Thanks A Million.

*The PCGS One Millionth Coin
1894-S Morgan Silver Dollar / MS-66*

PCGS was established to create a new standard for the rare coin industry in February of 1986. Our business principles were inspired by a genuine desire to preserve the integrity of the rare coin industry for collectors, investors and dealers, alike. Our objective was to revolutionize the rare coin industry . . . forever.

The certification of our one millionth coin on December 21, 1988, surpassed our greatest expectations, and symbolized a major milestone toward the achievement of that goal.

Today, thanks to your overwhelming acceptance and support, PCGS celebrates its third anniversary as the most successful grading service in the numismatic marketplace.

Precision third party grading, the PCGS guarantee of grade and authenticity, easy liquidity through the Ameri-

can Numismatic Exchange's electronic trading market, and consumer protection, are the advantages that have made PCGS *the* rare coin grading service of choice. In fact, PCGS clearly represents the lion's share of all certified coins currently traded.

In three short years, PCGS has certified 1,029,302 rare coins with a cumulative declared market value of \$934,678,164 through a network of 367 authorized PCGS dealers nationwide.

As PCGS focuses on the certification of our second million coins, we would like to express our appreciation to those in the numismatic community

who have helped us attain our success. We have worked very hard to earn your loyalty and respect. We are committed to continue to provide our valued clients with uncompromising quality and the highest industry standards for many years to come.

On the occasion of the twenty-fifth Anniversary of the *Greysheet*, We **EXPANDED** the *Bluesheet*!

The *Certified Coin Dealer newsletter* may only be in its fourth year, but it's never too early to make improvements. As part of the *Greysheet's* twenty-fifth anniversary celebration, the entire staff rededicated their efforts to serve our subscribers with the finest numismatic pricing information available. In the future, you will be seeing even more improvements in the CDN family of publications – not an easy job when you are already the market leader in providing accurate, unbiased, timely information.

In addition to the 543,004 prices *Bluesheet* subscribers now receive annually, we added:

Complete Morgan Dollar listings for both **prooflike** and **deep mirror prooflike** specimens.

All 52 \$20 Saint Gaudens, listed by date; new complete listings in seven grades.

Plus the nicest surprise of all – despite the cost of adding tens of thousands of new prices every year, we can still offer tremendous savings for annual subscribers, and **incredible** savings on multi-year subscriptions.

An expanded, improved *Certified Coin Dealer newsletter*. The "old" *Bluesheet* was already a great Value - which makes this the opportunity of the decade. We invite you to join in our continuing success.

If you think
we've only im-
proved the
Bluesheet,
Just wait until
you see what we
have planned
for the
Greysheet!

THE GRADING SERVICE for today's market of DISCRIMINATING BUYERS

Hallmark has been launched, and right now we are accepting submissions! Those who have seen the new Hallmark encapsulation have been enthusiastic, and you will be also!

Hallmark Grading Service recognizes that not all coins are created equal, even if they have the same technical grade, such as MS63, MS65, etc. As auction prices vividly demonstrate, as dealer-to-dealer transactions continually verify, coins which are Premium Quality, or which have a high degree of aesthetic appeal, or which are especially well struck, or which have some other feature lifting them above "generic" coins will often sell for more, often much more!

Hallmark Grading Service recognizes this important aspect, and not only gives you the MS65 or other technical grade as determined by our expert staff, but also designates Premium Quality, aesthetic desirability, die variety, mintage, pedigree, and other aspects when appropriate.

To sum it up: Hallmark-graded coins are for the discriminating buyer who wants something more than ordinary or "generic" grading.

We invite you to become part of the Hallmark success story. Send us the coupon below, and we will send you information about how you can submit your coins. If you are a dealer, request our packet of dealer information. Either way, Hallmark makes you and your coins a winner!

MARKET CONTINUES UPWARD SWING

Dealers Remain Optimistic As Year Winds Down

The Market in Depth

The rare coin market proceeds in a somewhat orderly manner as numerous plus signs can be seen throughout the charts. Many dealers are becoming more optimistic than they were just a few short weeks ago as their customers (collectors and investors) are showing renewed interest in several areas of the market. As this interest increases, it becomes more apparent to customers (dealers were already aware of this since they are always actively buying and selling coins) that various coins were not readily available at the previous Bid levels; so if dealers are serious about acquiring coins, which they seem to be, they must Bid substantially higher in order to shake loose some of the coins they need for their clients. This is the reason you can see some Bid increases of about 30% and more over the last couple of weeks.

The areas enjoying these large price movements are predominantly Commems, Type, and Gold (although Gold was mixed throughout the week and finished with numerous minus signs for the more obtainable issues). The following chart shows Bids of two weeks ago against today's Bids:

Denomination	October 20, Bid	November 3, Bid
Bridgeport MS-65	\$ 950	\$ 1,325
Delaware MS-65	\$1000	\$ 1,325
Lincoln-Illinois MS-65	\$1250	\$ 1,600
Shield Nickel w/Rays MS-65	\$3850	\$ 4,750
Seated Lib. 25¢ w/m PR-65	\$3575	\$ 4,500
Seated Lib. 25¢ Arr PR-65	\$9250	\$12,850

The upcoming Saccone Collection will be auctioned by Bowers and Merena, in New York City, November 6-8. This sale is packed with numismatic rarities which are sure to make the collector in us all, faint with envy. This collection was begun in the 1930's, and was continuously added to for several decades. Included in this sale are exceptional coins from all areas of American numismatics. From colonials, to Type coins, to Silver Dollars, Commems, and Gold (including territorial and private mint), almost anything you can imagine is in this sale. The following list is a small representation of the rarities which you will find in this sale:

Denomination	Cataloguer's Grade
1856 Flying Eagle Cent	PR-65
1916 Buffalo Nickel	PR-66 PCGS
1836 Gobrecht Dollar Judd-60	PR-60-63
1882 Trade Dollar	PR-65
1895 Morgan Dollar	PR-60/63
1908-S \$10 Indian Gold	MS-66 PCGS
MCMVII \$20 High Relief	MS-64/63
1851 Humbert \$50 Gold	AU-50

This Week's Market

CENTS: Last week's lethargy in the Lincoln series continues again this week. There is very little interest being shown at this time, even by the leading dealers in this area.

NICKELS: Trading in the Jefferson Nickel series is slowing slightly as dealers concentrate in other areas. However, the ever-popular 1950-D roll has edged forward to \$200 Bid. This roll has a very narrow trading range with buyers and sellers right around the Bid levels.

DIMES: BU rolls of Mercury Dimes are steady, while Roosevelt rolls continue to slip. The following rolls have fallen this week: 1949-S, 1952, 1954-D & S, and 1956-D. This is the first time in a long while that the 1949-S has been below the \$1000 mark.

QUARTERS: BU Washington Quarter rolls are mostly steady at today's levels, although there are a few changes to the downside. The 1942-D is lower at \$380 Bid, while most of the rolls from 1958 to 1964 also fell. One roll did climb this week; the 1942-S rose to \$2700 Bid.

HALVES: The Franklin series is still relatively steady at current Bid levels. Nonetheless, a few of the later issues are lower due to discounted sells. The 1960, and 1963-P & D rolls fell slightly to \$100 and \$65 Bid, respectively. On a positive note, the 1957-D is up to \$175.

DOLLARS: The Dollar market proceeds optimistically as plus signs liberally cover the charts. The only real weakness seems to be in common-date dollars in MS-63. Here, we have a small dilemma. With MS-63 certified coins bringing about \$44 each, most dealers are not willing to pay any more than \$25-\$30 for raw coins of the same grade. With the cost of certification being approximately \$25 per coin, it does not make much sense to submit anything less than a MS-64 (especially for common-dates). While we do consider the prices of certified coins in preparing prices for the CDN, they are less of an influence on lower priced common-date issues where there are likely to be more “raw” coins in the marketplace than certified ones.

PROOF SETS and MINT SETS: These two charts are fairly stable this week as dealers trade right around current levels. A few Mint Sets are higher.

COMMEMORATIVES: The Commem market remains very strong with the main thrust of activity taking place in the MS-64 & 65 columns.

TYPE: The number of plus signs has diminished this week in the Type charts, however, there seems to be a healthy balance of activity in this area. Even a few minuses serve to keep the market in a proper perspective.

Gold: The U.S. Gold chart shows a number of pluses, but due to inter-week trading at lower levels, there are also a number of minus signs.

EAGLES: Amer. PR Gold Eagles wholesale: 1986 1oz-\$420/\$433, 1987 1oz-\$426/\$441, 1/2 oz-\$198/\$215, 1988 1oz-\$650/\$685, 1/2oz-\$315/\$350, 1989 1oz-\$635/NA, 1/2oz-\$300/NA. PR Silver Eagles trade: 1986-\$26/\$27, 1987-\$19/\$21, 1988-\$70/\$75, 1989-\$40/\$44. BU 1986 Sil Eagles \$11/\$11.75.

THE GREYSHEET

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

COMMEMORATIVES

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

THE GRADING SERVICE for today's market of DISCRIMINATING BUYERS

Hallmark has been launched, and right now we are accepting submissions! Those who have seen the new Hallmark encapsulation have been enthusiastic, and you will be also!

Hallmark Grading Service recognizes that not all coins are created equal, even if they have the same technical grade, such as MS63, MS65, etc. As auction prices vividly demonstrate, as dealer-to-dealer transactions continually verify, coins which are Premium Quality, or which have a high degree of aesthetic appeal, or which are especially well struck, or which have some other feature lifting them above "generic" coins will often sell for more, often much more!

Hallmark Grading Service recognizes this important aspect, and not only gives you the MS65 or other technical grade as determined by our expert staff, but also designates Premium Quality, aesthetic desirability, die variety, mintage, pedigree, and other aspects when appropriate.

To sum it up: Hallmark-graded coins are for the discriminating buyer who wants something more than ordinary or "generic" grading.

We invite you to become part of the Hallmark success story. Send us the coupon below, and we will send you information about how you can submit your coins. If you are a dealer, request our packet of dealer information. Either way, Hallmark makes you and your coins a winner!

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market

closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

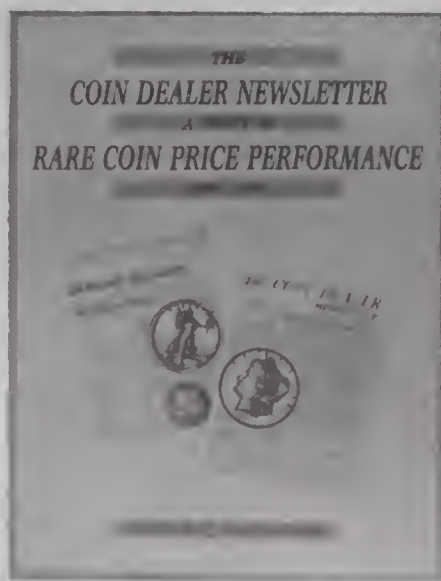

In addition, the volume contains market studies, articles, and commentaries by many of the best-

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

MARKET STILL RISING

Volatility Seems to be Here to Stay

The Market in Depth

Plus signs are continuing to dominate the charts, with only a few minuses as dealers (and their customers) seem to be waiting for additional price increases before taking some profits. The generic issues are largely holding steady with some pluses evident. The increased volatility seems to be making a new type of collector: the short-term holder. The collector whose desires outweigh his available cash is a prime candidate for the new style; purchase desirable items when they are out of favor and the dealer is looking for a cash customer, hold and enjoy them for four months, sell into the next rising market, and take the profits and invest them in other lagging areas. It may not be coin collecting as we knew it ten years ago, but it sure gives the collector a lot of "play" for his money, and the pride of having owned many different items.

The quick turn seems to work better for more generic issues. Rarer coins require a little more knowledge in playing the profit game. Take, for example, the 1916/16 Buffalo nickel, a genuinely rare coin. A quick look at the population reports shows PCGS with two graded, and NGC with one notch on their handle. This is not the kind of coin that you buy on the teletype systems; it is simply too rare and usually involves negotiation. This month, the circulated Bids as listed in the accompanying CDN Monthly Summary show tremendous jumps: Good, \$500 to \$900; VG \$675 to \$1200; Fine, \$975 to \$1800; VF, \$1450 to \$2900; XF, \$2300 to \$3975; AU, \$4100 to \$6600; MS-60, \$6600 to \$7500.

So, has the value of the coin increased that much? Well, maybe and maybe not. Maybe, if you had one to sell and were planning on selling it at high Bid, then waiting the month would make quite a difference. Maybe not if you were planning on selling it to the highest buyer in the marketplace (who may not be the highest Bidder, because he wants his upper limits kept secret). And maybe not because, in a strategy that only a numismatist could appreciate, the increases in value may even be greater! How? That part is deceptively simple. "Everyone" knew that the 1916/16 sold for above the highest advertised Bid; let's say 20% above. At \$1000 Bid, the coin would sell for \$1200; if Bid rose 20% to \$1200 and the seller still demanded a 20% premium, the coin would enjoy a real increase of \$240 in value.

Much of the fun of numismatics occurs when a new collector is introduced to the joys of ownership, and especially when good publicity is given to the activity of coin collecting. We would be hard pressed to think up a better publicity event for numismatics than Bruce McNall's special presentations of American Eagles to Gordie Howe and Wayne Gretzky professional ice hockey's old scoring record fell. If more numismatists would think of clever "tie-ins" for local events that would generate publicity, there is no telling the positive effect it would have on the hobby.

This Week's Market

CENTS: BU Lincoln rolls remained unchanged this week as the few leaders in this series appear satisfied with current levels. The few needs monitored have been at current Bids. Mostly late-date issues are being sought.

NICKELS: BU Jefferson Nickel rolls appear steady at current levels with one minor change. The 1948-S roll has fallen to \$15 Bid; the 1950-D roll is still wanted at the \$200 Bid.

DIMES: After several weeks of reoccurring minus signs in the Roosevelt series, this week finds a breather as the market steadies. Keep a close eye on this series to see if this stability continues or if it is just a momentary settling of a down market.

QUARTERS: BU Washington Quarter rolls are still showing some specific signs of weakness as several minus signs once again pop up. The 1942-D is now down to \$360 Bid, while the 1946-S is lower at \$160. The 1949-D has also dropped, now at \$265 Bid. A few later silver rolls are lower too. However, the majority of other dates are on want lists at current Bids, so this is not a completely dull market.

HALVES: BU Half Dollar rolls (Franklins and Kennedys) are steady at current Bids as buyers look for specific dates. The 1957-D Franklin roll has increased to \$185 Bid and a few Kennedy rolls have risen. However, some of the Kennedy rolls which were on want lists recently, are no longer.

DOLLARS: The market here seems very constant as the number of buyers is on the increase. From MS-63 through MS-65, an abundance of plus signs can be seen. The Prooflike columns also reveal various increases as the entire market heats up. The common date issues are firm at current levels, which can be considered very good news.

PROOF SETS AND MINT SETS: Both of these areas are stable with just a few corrections; changes are due to adjustments in dealer inventories.

COMMEMORATIVES: Both Gold and Silver Commems are in robust demand as dealers increase their buy prices. Most of the increases occur in the MS-64 and 65 columns. The lower grades are active at today's levels.

TYPE: The Type charts may not reveal as many plus signs this week as there were in the past few weeks, but the demand is still there. It seems like almost everyone is a marketmaker as they vie for available material.

GOLD: U.S. Gold seems to be the most volatile of all areas of the market.

This may be because as prices increase, some dealers are willing to take short-term profits rather than wait for even higher markets. This causes a few bumps in the road on the way to higher levels; however, this may be a healthy sign.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$425/\$435, 1987 1 oz-\$430/\$445, 1/2 oz-\$202/\$220, 1988 1 oz-\$650/\$685, 1/2 oz-\$315/\$350, 1989 1 oz-\$635/NA, 1/2 oz-\$300/NA. Proof Silver Eagles trade at: 1986-\$25.75/\$27.50, 1987-\$19/\$21, 1988-\$65/75, 1989-\$36/\$39. BU 1986 Silver Eagles trade at \$11/\$11.90.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin BID levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer Newsletter*. For specific certified BID levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with aye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

On the occasion of the twenty-fifth Anniversary of the *Greysheet*, We **EXPANDED** the *Bluesheet*!

The *Certified Coin Dealer newsletter* may only be in its fourth year, but it's never too early to make improvements. As part of the *Greysheet's* twenty-fifth anniversary celebration, the entire staff rededicated their efforts to serve our subscribers with the finest numismatic pricing information available. In the future, you will be seeing even more improvements in the CDN family of publications – not an easy job when you are already the market leader in providing accurate, unbiased, timely information.

In addition to the 543,004 prices *Bluesheet* subscribers now receive annually, we added:

Plus the nicest surprise of all – despite the cost of adding tens of thousands of new prices every year, we can still offer tremendous savings for annual subscribers, and **incredible** savings on multi-year subscriptions.

An expanded, improved *Certified Coin Dealer newsletter*. The "old" *Bluesheet* was already a great Value – which makes this the opportunity of the decade. We invite you to join in our continuing success.

If you think
we've only im-
proved the
Bluesheet,
Just wait until
you see what we
have planned
for the
Greysheet!

MARKET UPSWING INCLUDES COLLECTORS Bowers & Merena's Saccone Sale Realizes Over \$4 Million

The Market in Depth

When markets begin to heat up, the common dated issues usually start moving forward with abandon before the better issues start to catch on. In this current hot streak, common issues are stable at best, but they remain active at current levels. It almost appears that clients are studying numismatics to a greater degree than they have in the past. Whether they are studying charts of past performance, population reports, mintages or whatever, they are taking numismatics more seriously and the market seems to be responding to this trend. For those astute enough to realize the direction the market may be headed, it just might be a good time to buy specific issues; on the other hand, it is just as important to continue studying to determine when the right time to sell is at hand. The end of the 1980s might be best remembered for the definite changes in market cycles. First, the market goes up, then it goes down. That realization alone can make your clients better numismatic traders.

Bowers & Merena's \$4.2 million Saccone Collection sale, held in New York, provided collectors with a wide range of numismatic selections. In addition to the regular American issues and currency offerings, one entire session was devoted to exonomia. Of course, this variety makes the B & M catalogues such fascinating reading. Betts Medals, Counterstamps, Hard Times Tokens, Encased Postage Stamps, Mint Medals, Civil War Patriotics and Store Cards, Assay Commission Medals---everything the numismatic collector could desire. And the Hyman topical collection of medical numismatica for the specialist. These may not be the types of items that keep certification services in business, but they provide the stories that keep the collectors interested---and that is what keeps coin dealers in business!

Among the regular issues in the Saccone sale, several specialty offerings attracted attention, including the Rescigno Collection of NJ Coppers. Among the highlights:

Denomination	Cataloguer's Grade	Price Realized
1786 Immunis Col/NJ Shield	AU-55-58	\$33,000

CENTS: BU Lincoln rolls linger at current levels. There is very little activity for the majority of issues, unless they are offered at discounted levels. The 1960-P sm date roll fell slightly this week to \$67 Bid.

NICKELS: BU rolls of Jefferson Nickels seem to be as dormant as Lincoln Cents. However, the difference is that there are some Jefferson dates in demand at current levels. If you have been following the 1950-D roll for the last couple of weeks, you would have noticed that it rose to \$200 Bid. Well, it has now backed-off to \$195. This roll has a very narrow trading range.

DIMES: This is the second straight week that the Roosevelt series is not showing minus signs. Maybe this series is about to firm up after several months of a continuous downward spiral.

QUARTERS: Even BU Washington Quarters are finding stability. Maybe it is the positive tone of the entire market, or, the fact that silver bullion is steady. The 1942-S roll is higher at \$2800 Bid, while a few late-date issues have also climbed upward.

HALVES: A couple of the Walking Liberty Half issues are lower due to discounted selling: 1943-P and 43-S, now Bid at \$1400 and \$2100, respectively. Franklins remain strong at current Bid levels; Kennedys are steady with a little less Bidding activity than was seen previously.

DOLLARS: The Dollar market is proceeding nicely as plus signs are scattered throughout the MS-64 and 65 columns. Common dates are holding firm at current levels as dealers are confident of their present positions. Deep-Mirror Prooflike Dollars are still on the rise as dealers try to corner a fat share of this market.

PROOF SETS and MINT SETS: There are numerous changes in these two charts as various sets are being offered at lower levels. This may be a little surprising since the holiday season is closing in quickly; and this is usually the time that dealers begin to stock up for the gift-giving season.

COMMEMORATIVES: Commems (both Gold and Silver) remain quite potent at today's levels. In the Silver Commems, higher Bidding can be found mostly in the MS-65 column, while the Gold Commems are Bid higher in the MS-63, 64, and 65 columns.

TYPE: The Type market is as active as any other series at this time. There is such a wide variety of collectors of coins in this category that it would be almost impossible for the market to be as hot as it is and not have Type a strong participant.

GOLD: Even though the MS-65 column is not covered with plus signs as it has been the past couple of weeks, U.S. Gold is very steady at current levels. There are enough plus signs in the lower grades to indicate a powerful confidence in this area.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$428/\$443, 1987 1 oz-\$433/\$448, 1/2 oz-\$205/\$215, 1988 1 oz-\$650/\$685, 1/2 oz-\$315/\$350, 1989 1 oz-\$625/NA, 1/2 oz-\$305/NA. Proof Silver Eagles trade at: 1986-\$25/\$28, 1987-\$20/\$21, 1988-\$70/\$78, 1989-\$37/\$41. BU 1986 Silver Eagles trade at \$11.20/\$11.90.

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins

MS-60 Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Because the customer wants to know...

Because the coins can be worth significantly more...

Because today's buyers are increasingly sophisticated...

Time was when rare coin buyers were not sophisticated. To many, particularly those with investment in mind, an MS-65 was an MS-65 was an MS-65.

\$1,000 More for PQ

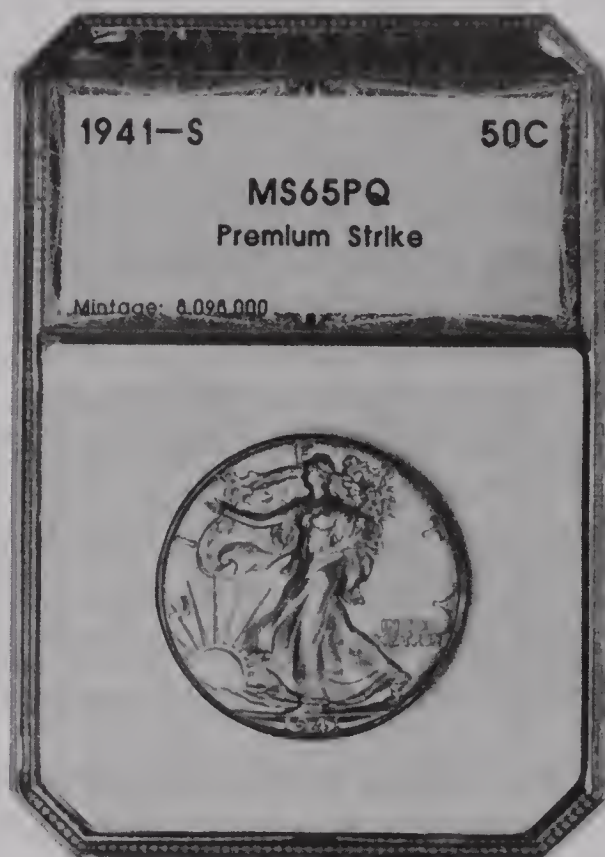

Reality is different. Not all MS-65 coins are alike, and often a sharply struck coin of superb aesthetic quality, such as a 1941-S half dollar which we designate MS-65PQ (Premium Quality), can be worth significantly more than a "generic" MS-65. Indeed, the 1941-S half dollar, which is usually found weakly struck, can be worth many hundreds of dollars more if it is of Premium Quality. A leading rare coin firm recently considered two MS-65 coins of this variety, one a "generic" piece and the other MS-65PQ, and offered \$1,000 more for the MS-65PQ.

More Than "Generic"

HALLMARK Grading Service recognizes that coins are not "generic," and provides the sophisticated coin buyer not only with third-party unbiased grading, but, as applicable, information concerning Premium Quality, mintage figures, die varieties, and pedigrees...all imprinted on a high-security (by American Bank Note Co.) certificate insert in a clear, attractive, museum-quality encasement (slab).

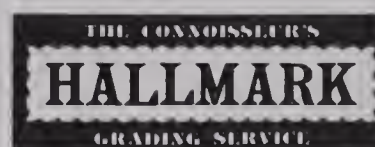

For Discriminating Buyers

To sum up: HALLMARK-graded coins are for today's discriminating buyers who want something more than ordinary or "generic" grading. Those who have already experienced our quality and service are enthusiastic, and you will be also!

MS-65 PROOF-LIKE (GEM UNCIRCULATED PROOF-LIKE) will exhibit the same characteristics as the MS-65, but with the additional feature of deep mirror proof-like surfaces both sides.

MS-67 & MS-67 PROOF-LIKE (SUPERB) will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They reside from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63, but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Listed bids for Copper issues are for Red and Brown quality. Full Red will command much higher levels.

INFLATION FEARS STIMULATE LATEST MARKET UPSWING Price Increases Show Impressive Strength

The Market in Depth

Inflation seems to be one of the leading factors influencing this latest market surge; perhaps not the most important reason for this advance, but certainly one with a strong impact. To the typical American numismatist, prices had slipped to very reasonable levels by October; however, this class of buyers will usually wait until they see a turn-around before they jump back into the market. But with some recent reports of inflation on the rise, this ultimate consumer seems to have reentered the market earlier than might be expected, sparking this newest round of pluses. Many dealers report that their clients have approached them with new want lists for specific issues, as well as increased general demand.

To substantiate this supposition, it is necessary to examine some of the missing ingredients from a classic market ascent. Normally, dealers begin adding to inventory in anticipation of an ensuing upswing; after all, there is no better time to buy than when the price is low. And I suppose it is obvious that the best time to sell is when the prices are high (unless you want to end up as one of your best customers). The early summer of 1989 was marked by a critical cash crunch causing dealers to be sellers rather than buyers, so many were not able to take advantage of the current market dips. This situation provided a real opportunity for astute collectors and investors, especially at auctions.

In addition, a few of the recent upward markets have been partially fueled by "Wall Street" money participating in the numismatic field. Rumors of a major fund continue, but any real activity would seem a long way off; so we can discount this as a major force in this fresh wave of price increases.

Another factor to consider is the recent increase in gold bullion prices, which some observers attribute to the same fears of inflation. If gold rises on world political uncertainty, there has certainly been lots of head-shaking among political analysts during the past two months; but if it is supposed to rise during times of political tension and confrontation, it should be falling faster than the Berlin Wall. Whatever the reasons behind the recent increases, all holders of gold would rather see gold at \$398 rather than \$360; unfortunately, when the price is deflated (with 1976 = \$1.00), gold is still selling well below \$200 per ounce.

A final note on inflation---while inflation has been an effective mover of prices over the past two decades, it has the disadvantage of being a "reactive" motivator. A dealer can establish his level of competence, margins, and customer service standards, but he has no control over inflation. He can only react; and if it becomes the dominant mover of market prices (as it did in the late-'70s), then the dealer's pricing is out of his control, and he can only 'go along for the ride'. While some dealers may yearn for the 'good old days', most will be content to remember that they made good money and survived, but wouldn't especially care to repeat the experience.

This Week's Market

CENTS: While usually quiet, the BU Lincoln rolls chart has a noticeable amount of plus signs this week. Those active issues are: 1944-S (\$10 Bid), 1945-D (\$15 Bid), 1948-S (\$21 Bid), 1951-D (\$9 Bid), and 1952-S (\$20 Bid). The 1960-P sm date roll has slipped a little more this week; now Bid at \$65.

NICKELS: BU Jefferson Nickel rolls remain very lethargic as dealers are content to leave well enough alone. Most dealers are only interested in rolls if they are discounted.

DIMES: The Roosevelt Dime series is steady at current levels as most activity seems to be taking place at or near these Bids. The lone decrease this week was the 1954 roll, now at \$30 Bid.

QUARTERS: The majority of BU rolls of Washington Quarters remain fairly active at today's Bids. Many issues are currently in strong demand at these levels even though some dealers are strictly bargain-hunters. The 1942-S roll has now increased to \$2900 Bid.

HALVES: While the Franklin series remains stable at current Bid levels (the only exception is the 1955 roll, lower at \$155 Bid), the Kennedy series is showing some signs of weakness. Several issues have fallen this week due to a sprinkling of lowered sells.

DOLLARS: Dollars continue to lead the "want list parade". The MS-63, 64, and 65 columns, all exhibit numerous quantities of plus signs. What's more, is the fact that the common date issues remain solid at current Bids.

PROOF SETS and MINT SETS: The majority of Proof and Mint Sets are finding buyers at today's Bids as dealers begin stocking up for the holidays, if they haven't already. However, there are several Mint Sets which are experiencing some softness and as a result are lower this week.

COMMEMORATIVES: Higher Bidding seems to be very moderate this week in the Gold and Silver Commem columns. Nonetheless, this series is stable at current levels. There seems to be some specific profit-taking for just a few of the silver issues which have risen dramatically, of late.

TYPE: Judging by the looks of the Type market, most dealers would get the impression that this market has slowed dramatically. However, such is not the case. Dealers are more than willing to take most available issues when they are offered at today's Bids. Although, it does appear that several of the leading marketmakers are "out of town" for Thanksgiving.

GOLD: Although the U.S. Gold chart exhibits some minus signs this week, the majority of issues are active at these Bid levels. Increased Bids have slowed the last couple of days, so most buyers are content with today's Bids.

EAGLES: American Proof Gold Eagles trade at: 1986 1 oz-\$435/\$445, 1987 1 oz-\$437/\$450, 1/2 oz-\$208/\$220, 1988 1 oz-\$650/\$685, 1/2 oz-\$315/\$350, 1989 1 oz-\$625/NA, 1/2 oz-\$305/NA. Proof Silver Eagles are wholesaling at: 1986-\$25.25/\$27.25, 1987-\$19/\$21, 1988-\$72/\$78, 1989-\$38/\$40. BU 1986 Silver Eagles trade at \$10.50/\$11.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summary, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDN. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. INVESTORS NOTE: The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.
 MS-60 - Unc. may not have full mint luster, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.
 MS-63 - Choice BU - Brilliant Unc. may exhibit some toning, but it should not be so dark as to hide any problems, will have minor blemishes and may show weakness of strike. Above average coins.
 MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.
 MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Because the customer wants to know...

Because the coins can be worth significantly more...

Because today's buyers are increasingly sophisticated...

Time was when rare coin buyers were not sophisticated. To many, particularly those with investment in mind, an MS-65 was an MS-65 was an MS-65.

\$1,000 More for PQ

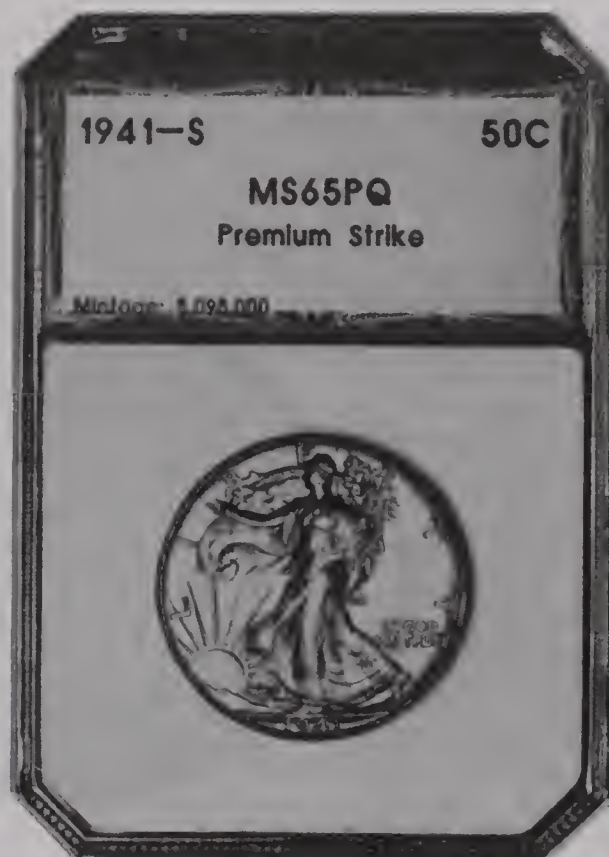

Reality is different. Not all MS-65 coins are alike, and often a sharply struck coin of superb aesthetic quality, such as a 1941-S half dollar which we designate MS-65PQ (Premium Quality), can be worth significantly more than a "generic" MS-65. Indeed, the 1941-S half dollar, which is usually found weakly struck, can be worth many hundreds of dollars more if it is of Premium Quality. A leading rare coin firm recently considered two MS-65 coins of this variety, one a "generic" piece and the other MS-65PQ, and offered \$1,000 more for the MS-65PQ.

More Than "Generic"

HALLMARK Grading Service recognizes that coins are not "generic," and provides the sophisticated coin buyer not only with third-party unbiased grading, but, as applicable, information concerning Premium Quality, mintage figures, die varieties, and pedigrees....all imprinted on a high-security (by American Bank Note Co.) certificate insert in a clear, attractive, museum-quality encasement (slab).

For Discriminating Buyers

To sum up: HALLMARK-graded coins are for today's discriminating buyers who want something more than ordinary or "generic" grading. Those who have already experienced our quality and service are enthusiastic, and you will be also!

HALLMARK Success Story

We invite you to become part of the HALLMARK Grading Service success story. Send us the coupon below, and we will send you information about how you can submit your coins. If you are a dealer, request our packet of dealer information. Either way, HALLMARK makes you and your coin a winner!

The Emperor and the King Hold Court at PCGS.

Introducing our Canadian Coin Grading Service

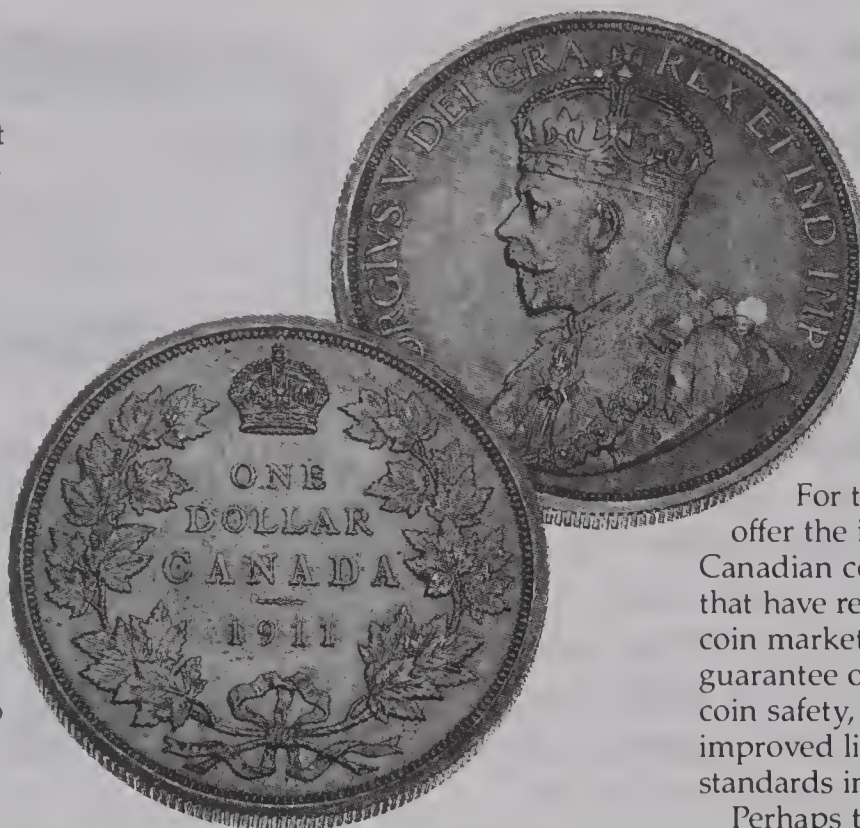

Nearly four years ago, the Professional Coin Grading Service was established to meet the urgent need for standardized, third-party grading in the rare coin industry.

Since 1986, PCGS has graded 1,628,961 U.S. coins with a cumulative declared market value of \$1,756,781,783 through a network of 490 authorized PCGS dealers throughout the United States and Canada.

Now PCGS is proud to announce a new service tailored to meet the needs of the Canadian coin market.

Over the past 18 months, PCGS has enlisted the expertise of many of the leading Canadian numismatists on the continent (including Walt Armitage, Sandy Campbell and Charles Moore) to diligently assemble a representative grading set of Canadian Coins.

With all systems in place, our new Canadian coin grading service is now

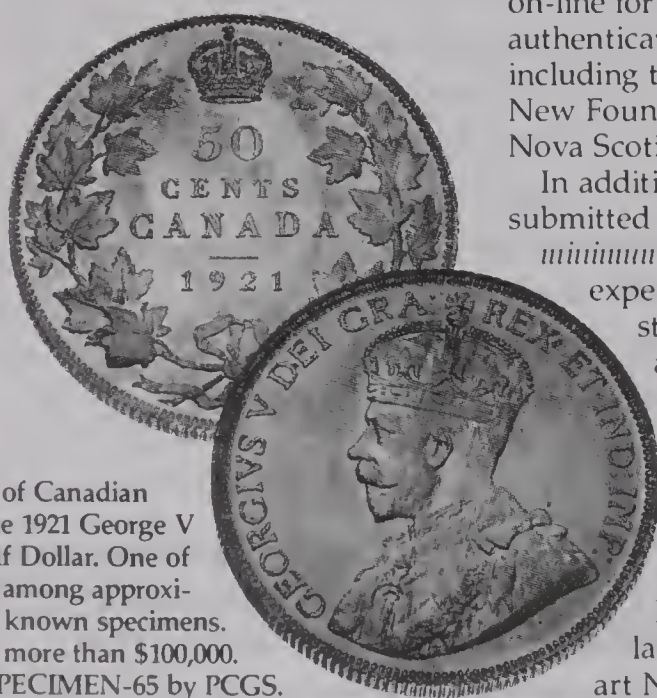

The Emperor of Canadian Coins. The 1911 George V Silver Dollar. One of two known specimens. Valued at \$750,000. Graded SPECIMEN-65. The first Canadian coin graded by PCGS.

For the first time ever, PCGS can offer the investors and collectors of Canadian coins the same advantages that have revolutionized the U.S. rare coin market: The unparalleled PCGS guarantee of grade and authenticity, coin safety, consumer protection, improved liquidity, and the highest standards in the industry.

Perhaps that's why PCGS was selected to grade the two most famous and highly valued Canadian numismatic rarities in existence: The Emperor and the King of Canadian coins.

Shouldn't your Canadian coins be graded by the Professional Coin Grading Service, too? For more information about all of our services, write or call today.

The King of Canadian Coins: The 1921 George V Silver Half Dollar. One of the finest among approximately 12 known specimens. Valued at more than \$100,000. Graded SPECIMEN-65 by PCGS.

on-line for the certification and authentication of Canadian coins, including the Maritime Provinces of New Foundland, New Brunswick, Nova Scotia and Prince Edward Island.

In addition, each Canadian coin submitted to PCGS is graded by a minimum of three members of our expert Canadian coin grading staff before the final grade is assigned. PCGS employs the same 70-point grading scale utilized in the grading of U.S. coins, and designates Mint State, Specimen, Proof-like and Proof Striking on Canadian coins. Each coin is also encapsulated in our new state-of-the-art NumisCap™ coin holder, as well.

COINALYSIS™

(The Easy Way to Identify Undervalued Coins)

In the new marketplace of sight-unseen trading, slabs and expensive population reports, you need more than "feelings"--- you need in-depth information plus "on the money" analysis.

MAXIMIZE THE VALUE OF POPULATION REPORT DATA

Until recently, only the "big boys" with their huge staffs and computers could identify undervalued coins. And they NEVER made their findings public. By purchasing underpriced rarities for themselves, they profited handsomely.

Then certification services began selling their population reports. Subscribers still found that the "big boys" had an advantage: They applied their computers and experience to make the population reports invaluable.

Now YOU can take maximum advantage of current population data with The CoinAlysis™ Report. Developed by Barry Stuppler, a CABDAP and PNG member with 30 years experience in the rare coin industry, population information is 10 times more valuable when organized and analyzed by The CoinAlysis™ Report.

WHAT IS COINALYSIS™

The CoinAlysis™ Report is the new service that tells you which coins are ready to "go" and which have already gone to far!

Generated by a powerful computer program using literally thousands of bits of data, possessing The CoinAlysis™ Report is like having the knowledge of a team of veteran rare coin dealers at your fingertips! The CoinAlysis™ Report will help you:

- *Build a position of undervalued coins
- *Avoid overpriced coins
- *Out-maneuver your competition
- *Enjoy above-average profits

To obtain a special Preview CoinAlysis™ Report on the Morgan and Peace dollar series, call TOLL FREE 1 (800) 827-4653. Or complete and mail the handy order form at the bottom of this page.

By return mail you'll receive The CoinAlysis™ Report's Special Preview, which examines and analyzes Morgan and Peace silver dollars --- two of today's most popular series. You'll see for yourself which coins are the best values. You'll know which dollars to buy at your next show. And, best of all, you'll know which coins to sell and/or avoid.

FREE BONUS IF YOU ORDER BY DECEMBER 15, 1989

Order before December 15th and you'll receive --- absolutely FREE --- a complete review of the 12 most popularly traded U. S. Gold Type coins. This \$15.00 report is FREE when you order before December 15th! So call TOLL FREE today!

HOLIDAY SHOPPING ANTICIPATED Gifts of Gold, Silver, and Slabs

The Market in Depth

The early weeks of December often find dealers of one mind; there is usually some slackening of activity between Halloween and Thanksgiving, as vacation and family takes priority. The market usually softens a bit on the Bid side as dealers decrease their teletype activity, and isolated sells are often sufficient to create a few 'minus' signs. This year's pre-Holiday softness is most apparent on some of the common dates, especially in the dollar series in MS-64 and MS-65. Still, these items are only off slightly, which considering the volatility of the market this past year, is something of a minor triumph. Dealers are anticipating that prices should pick-up with dealers coming back into the marketplace this week.

Then the dealers begin to gear up for Holiday gift giving, and we see flurries in the market as well as in the air. When it comes right down to it, coins make gifts of enduring value, especially important to a culture marked by 'throw away' values. The season also presents many opportunities to win new customers and collectors. Since the 'coin shop' can be somewhat intimidating to first-time visitors, it is especially important for dealers to make their new customers feel at home. A dealer friend recently reminded us that even though these 'first-timers' are likely to require a lot of personal attention, this is the opportunity for a new collector to be lost or gained.

We are seeing some increased Bidding on Proof and Mint sets, not uncommon during the Holiday season; hesitant or uncertain new customers will feel safe purchasing an 'officially' sealed government issue. And why not? After all, how many of us started out buying mint and proof sets directly from the government? Of course, the recent bullion issues also make dandy gifts, even if their numismatic heritage is somewhat checked. Anything that brings collectors into the shop and into the hobby is bound to be good for the dealer and the entire coin market.

There is also increased activity in Columbian related merchandise, especially the less-expensive material in the cheaper grades; because of the abundance, some Bids are just starting to creep upward. Hopefully, the events planned for 1992 will be sufficient to give Americans a sense of celebration for this marvelous anniversary. One might suppose that anniversary number 500 isn't all that different from 499, but reality says that "we" like round numbers for really big celebrations. And commemorating 500 years of the discovery of the New World sounds to us just about as big as they come. Watch for rising Bids on this material as demand begins to overwhelm supplies.

This Week's Market

CENTS: Moderate activity was monitored last week in the BU roll market.

The Lincoln series was no exception. The few changes that were found are noted with plus signs; the 1940-P & D and the 1953-S rolls.

NICKELS: BU rolls of Buffalo and Jefferson Nickels are steady at current levels as very little discounting has been seen. Many late-date issues are in demand at today's levels.

DIMES: BU Roosevelt Dime rolls are also steady as the last three weeks have found this series strengthening. Prior to this time, almost every week revealed a few minus signs.

QUARTERS: The Washington Quarter series is fairly strong at today's Bid levels as a couple of buyers are in the market for various dates. It just may be that with Silver on the rise that most potential sellers of Pre-1964 issues are waiting to see "which way the wind blows".

HALVES: This week finds all three Half Dollar series (Walkers, Franklins, and Kennedys) stable. Very little activity has been monitored, however, what we have found is of a positive nature. Many issues are being sought at current levels.

DOLLARS: The Dollar market has suddenly turned fickle. There are several minus signs throughout the Mint State charts as several dealers are offering various issues at discounted levels. This may be a result of less-active Bidding on the part of the marketmakers which would normally absorb these type of sales.

PROOF SETS and MINT SETS: This area is very active as dealers with coin shops stock up for the holiday season. Despite this fact, there are some minus signs for issues which are available in discounted quantities.

COMMEMORATIVES: Silver Commems are still active, although the number of plus signs has diminished the last week. As we mentioned in "The Market in Depth" article, the Columbian Exposition Commems are especially active in the circulated grades. The 1892 in Fine is Bid at \$13, and in VF-\$15.50. Many dealers are anticipating tremendous demand in 1992.

TYPE: The Type market is mixed as pluses and minuses cover the charts. Nonetheless, minuses outnumber pluses by a wide margin, thus, causing some concern by some dealers. Most dealers feel this is a temporary situation which will be corrected when the marketmakers start Bidding again.

GOLD: Mint State Gold looks a little weak as marketmakers have withdrawn their Bids or lowered them considerably. Again, most dealers feel this market will reverse itself rather quickly.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz - \$440/\$458, 1987 1 oz - \$445/\$463, 1/2 oz - \$217/\$230, 1988 1 oz - \$645/\$685, 1/2 oz - \$315/\$345, 1989 1 oz - \$625/NA, 1/2 oz - \$305/NA. Proof Silver Eagles trade at: 1986 - \$25.25/\$27.25, 1987 - \$19/\$21, 1988 - \$72/\$79, 1989 - \$37/\$40. BU 1986 Silver Eagles trade at \$10.50/\$11.30.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summary, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDN. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET

Numbers are used as shorthand for adjective grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor blemishes and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

From HALLMARK:

THANK YOU!
THANK YOU!
THANK YOU!

THANK YOU! Lee J. Bellisario, president, and the entire staff of the HALLMARK GRADING SERVICE, INC. thanks the dealers, collectors, numismatic writers, and others who have expressed enthusiasm concerning our product. HALLMARK coins are now entering the marketplace and are in demand.

HALLMARK recognizes that coins are not "generic", and provides the sophisticated coin buyer not only with third-party unbiased grading, but, as applicable, information concerning Premium Quality, mintage figures, die varieties (Sheldon, Overton, Breen, et al numbers), pedigrees, etc., all imprinted on a high-security (by American Bank Note Company) certificate in a clear, attractive, museum-quality encasement (slab).

GOOD NEWS: The turnaround time for our regular service is just 10 business days. Submit your coins to us now (write or call for the name of the HALLMARK dealer closest to you, or pick the dealer of your choice) and they will be back in your possession – ready to sell or enjoy-before you know it! At HALLMARK we combine the latest in technology with unsurpassed expertise and efficiency.

The HALLMARK logotype identifies dealers who demand the finest for their clients.

BULLION MARKET SPARKS INTEREST Market Relatively Steady at Silver Dollar Show

The Market in Depth

The Tenth National Silver Dollar Convention concluded this past week with mixed ratings. Some dealers on the teletype systems reported that they felt the show was less than successful, while others were very happy with the show results. Many dealers reported directly to us at the show that they were content with the amount of activity that took place; even though some prices were slightly lower.

In the overall scheme of things, it appears that the most actively traded coins (Commems, Dollars, Gold and Walkers) have slipped a little this past week. This is not an uncommon occurrence when a major show takes place. Lots of dealers with lots of inventory, all in one place; if there are no large orders to fill, then something has got to give a little, and it is usually prices. However, when dealers return to their stores and offices, they begin to reassess their inventory positions and once again commence their Bidding activities. As of this writing, this is indeed the case. Several dealers are back at their computers and updating their Bids; many Bids are at higher levels.

The talk of the show seemed to be, "How high could gold and silver climb before levelling off or retreating?" As you might guess, there are many opinions as there are dealers. This is especially so when they try to explain the sudden run-up in bullion. Many feel that the Soviets are considering a move to back the Ruble with gold, but others feel this is only a ploy to force the price of gold up long enough to sell into a higher market and take advantage of these higher levels. Whatever the case may be, gold fell back to the \$400 level before rallying slightly.

This is the time of the season when many dealers stock up for holiday shoppers. As always, Proof and Mint Sets are on want lists, as well as, Contemporary Commemoratives. One of the main reasons these items are in such hot demand is because they are in attractive (so to speak) holders. They are usually not purchased with resale value in mind, just with ease of purchase and many times because of the date on the coins. In addition, gold coins and jewelry are always popular for those with more expensive tastes and fatter pocketbooks. 'Tis the season to be jolly. Give your customers a little more time this holiday season and help them become collectors---sell them some numismatic books for their libraries.

This Week's Market

CENTS: BU rolls of Lincoln Cents are mostly steady at today's levels, although not many dealers are actually spending much time trying to buy rolls. There are some specific needs, but these are usually limited by quantities.

NICKELS: Jefferson Nickel rolls are in the "same boat" as Lincoln rolls.

They are extremely quiet. Moreover, the only reason many dates do not retreat is because dealers are not willing to invest the time to offer them at discounted levels.

DIMES: Mercury Dimes are holding steady at current Bid levels, yet, the Roosevelt series is showing a reoccurrence of minus signs. After holding firm for the last few weeks, a handful of Roosevelt Dimes are lower due to discounted sells. Those dates are: 1949-S, 1951-S, 1952-S, 1954-S, and 1959-D.

QUARTERS: Potential buyers keep the Washington series moderately steady at current Bids, with some late-date issues even stronger. The lone exception is the 1947-P roll, now down to \$210 Bid.

HALVES: Franklin and Kennedy Halves remain stable as buyers try to purchase specific issues. Most Bidding takes place at current levels. Nonetheless, some dealers are in the market to buy at discount if someone else is willing to sell at below market.

DOLLARS: The Dollar market continues to adjust downward somewhat.

However, the decreases are more of a trickle than a major drop. This is still an active market and most dealers have want lists to fill. It is just a matter of economics; if a dealer can buy coins at a lower level, why not?

PROOF SETS and MINT SETS: Despite a few minus signs, these two areas are very active. Gifts for the holidays are a prime reason why Proof and Mint Sets are on most dealers' want lists; even if you are a dealer who doesn't buy them the rest of the year.

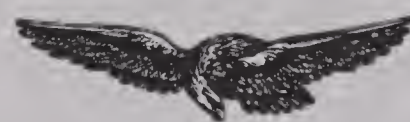

COMMEMORATIVES: Gold and Silver Commems are trading at current levels despite the fact that there are several minus signs in the MS-65 columns. Most of the declines in Silver Commems are a result of dealers dropping their Bids dramatically, or, pulling them altogether.

TYPE: The Type market contains a healthy mix of plus and minus signs.

Even though these are not "big Silver Dollars", many dealers were active in this area at the Silver Dollar Show. Some dealers feel this is a good time to buy into this market as it appears to be "flat".

GOLD: In spite of the lackadaisical showing in the gold chart this week, there are very few sellers at current levels. The issues with minus signs are a result of marketmakers lowering their Bids substantially.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz - \$431/\$448, 1987 1 oz - \$436/\$455, 1/2 oz - \$212/\$227, 1988 1 oz - \$645/\$675, 1/2 oz - \$315/\$345, 1989 1 oz - \$650/\$700, 1/2 oz - \$330/\$395. Proof Silver Eagles trade at: 1986 - \$25/\$27, 1987 - \$19/\$21, 1988 - \$72/\$79, 1989 - \$36/\$38. BU 1986 Silver Eagles trade at \$10.50/\$11.30.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific *CDN* Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to *CDN* Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to *CDN* as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor blemishes and may show weakness of strike. Above average coins.

MS-64 Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

COMMEMORATIVES

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Now available in one single volume is a distillation of data gathered over a 25-year period by America's leading source of coin price information: *The Coin Dealer Newsletter*! Market

closing prices are given year by year, 1963 to date, for all popular series, including silver dollars, gold, commemoratives, bullion gold and silver—you name it! Here in 527 information-packed pages is the most authoritative source in print for U.S. coin market data!

At your fingertips is a vivid record of the coin market, cycles, changes in popularity, changes in grading interpretations, and other events which have shaped the market. Year after year, this information has been used by dealers, government agencies, collectors, and investors—but **never before** has it been available all at once in a single volume. For just \$34.95 (softbound) or \$49.95 (limited hardbound) you gain a veritable **encyclopedia** of coin market information that cost MILLIONS OF DOLLARS to gather over a period of time! Indeed, this information cannot be duplicated elsewhere **FOR ANY PRICE!**

In addition, the volume contains market studies, articles, and commentaries by many of the best-

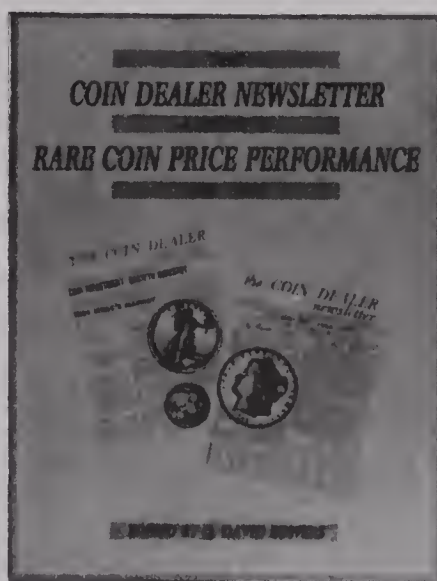

known authors in the rare coin field, those who have written "Monthly Summaries" over a long period of time. This book can make you a **MARKET EXPERT!** There is no better way to **PREDICT THE FUTURE** than to know what has happened in the past!

This immense book has been prepared in coordination with the editor and publisher of *The Coin Dealer Newsletter* and has been edited by Q. David Bowers.

GUARANTEE: After you receive your book, you have a full 30 days to be sure it is worth every penny of the price paid—and more—or it may be returned for an instant refund, no explanation necessary! However, we are sure that you will find

that if we charged you twice the price for the book, it would still be the **INFORMATION VALUE** of a lifetime! Order your copy today by calling toll-free (800) 222-5993, or mail the coupon below.

GOLD CONTINUES TO OCCUPY SPOTLIGHT

Coin Trading Slow And Steady

The Market in Depth

The laid-back Holiday spirit continues to dominate market activity (or inactivity, to be more precise). The coin market appears steady but somewhat slower for common generic coins. Better coins are trading on an 'as-needed' basis at current levels. Also in keeping with traditional Holiday buying patterns, modern issues are trading actively, including Mint and Proof sets, Prestige sets, Eagles, and Commemoratives.

During 1989, the U.S. Treasury Department's marketing efforts to encourage Americans (among others) to buy gold Eagles seems to have paid off. The premiums for many of the foreign gold bullion coins have been drifting slightly lower. The lessening demand has caused many bullion dealers to lower their Bids to melt (or less in some cases!). Marketmakers specializing in foreign gold usually offer to buy large deals at a discount anyway, since inventory enlargement is an inevitable consequence of small-quantity buyers to whom they must sell.

As the bullion-only buyers increasingly stick with the good ol' American Eagle, coin collectors are being encouraged with the widening range of dates and Mint/Proof choices in the series. When all you are trying to do is put a little nest-egg of gold in the safe deposit box, nobody needs to borrow the political troubles of less fortunate nations.

Bullion prices continue to respond to factors of uncertainty. The biggest question continues to be the Soviet Union. Their need for hard western currencies has forced them in the past to be net sellers of gold (their skilled traders often cloaked their intentions with offsetting trades), oil, and diamonds; their desperate need for modernization, combined with their more open embracing of western technology should cause their needs for dollars and deutschmarks to grow. More sales of physical assets should depress prices (something that we certainly haven't been seeing!). On the other hand, if they aggressively pursue their goal of making the ruble convertible, they just may back it up with gold---which would force them to become buyers of gold. If you think it preposterous that any nation would make its currency convertible into gold in this day and age, we ask you to name any single action that would establish better credibility with the western banks. Besides, this has been a crazy year for the foreign analysts anyway. Either way, expect continued activity in the bullion markets.

This Week's Market

CENTS: The overall roll market remains slow as most dealers concentrate on holiday gift items. BU rolls of cents may be a good stocking-stuffer, but they are not high on the list of “things” wanted as gifts.

NICKELS: Activity remains sparse in the BU roll market for nickels. The only change we monitored this week was for the 1938-D, Buffalo roll; it is now at a higher \$710 Bid.

DIMES: Despite the numerous minus signs last week in the Roosevelt series, this week reveals some steadiness. Whether dealers are just sitting back and waiting to see what happens next, or, just ignoring this series well, we will just have to sit back and see.

QUARTERS: BU Washington Quarter rolls have the usual “wants” at current Bid levels with a few issues needed at higher Bids. Most of the increases are found in the late-date clad issues. The 1945-P roll is lower at \$160 Bid.

HALVES: BU rolls of Franklin Halves are still active at current Bid levels, although some dealers continue to attempt to buy them at discounts. In the Kennedy series, there are a few dates which are lower: They are the 1967, 1968-D, and 1969-D rolls.

DOLLARS: This seems to be a good time of the year to try and buy those Dollars which may have seemed too high during the year. Numerous dates are slipping due to a lack of Bidding activity and occasionally, various dates can be found at discounted levels. However, it is difficult to locate any quantities of specific dates at discounted levels.

PROOF SETS and MINT SETS: Proof Sets remain stable at today's levels, while Mint Sets are active but at lower Bids. There are several Mint Set issues which have fallen due to lower offers to sell.

COMMEMORATIVES: The Silver Commem market has a fairly good mixture of plus and minus signs as dealers try to balance their inventories. Gold Commems are stable at today's Bids. This might be another area where a potential buyer may be able to locate some good "buys" before the FUN Show.

TYPE: The Type market appears to be the strongest area of all numismatics. There are certainly enough plus signs to make one feel confident that this is the case. Many dealers are attempting to stock up for the FUN Show as they feel this will be the beginning of a good year.

GOLD: Even though Gold bullion has jumped dramatically this past week, it doesn't seem to have had much affect on prices, with the exception of Twenties. Nonetheless, the Gold market is stable at current prices.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz - \$440/\$450, 1987 1 oz - \$449/\$460, 1/2 oz - \$219/\$230, 1988 1 oz - \$645/\$685, 1/2 oz - \$315/\$340, 1989 1 oz - \$650/\$700, 1/2 oz - \$310/\$350. Proof Silver Eagles trade at: 1986 - \$25/\$27, 1987 - \$19/\$21, 1988 - \$72/\$76, 1989 - \$35/\$39. BU 1986 Silver Eagles trade at \$10.70/\$11.30.

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of CDN, Monthly Summary, and Certified Coin Dealer newsletter. For specific certified Bid levels, please refer to CCDn. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids

THE GREYSHEET

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor blemishes and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far end away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

THE ADVERTISING BUY OF THE DECADE WILL BE IN YOUR HANDS NEXT WEEK

The Coin Dealer Newsletter family of publications reaches every major dealer in America, as well as all serious investors and collectors. This is your prime numismatic audience – these are the sophisticated numismatists that you can target only through advertising to our elite group of subscribers.

Your advertisement in the **1990 Numismatic Dealer Directory** will reach this audience for one entire year! A free copy of the directory will be mailed to every one of our subscribers shortly into the new year. As effective as our weekly advertisements are, just imagine getting a whole year's worth of impact for less money. A full page ad will only cost \$85 per month; or you can enjoy very large discounts for prepayment and/or multiple placements. We will have a wide range of sizes and placements for your convenience – everything from your business card to a full page, and all at very reasonable rates. We will be printing shortly into the New Year, so time is of the essence! Make sure to place your reservation now for "Greypages" advertising!

Just watch your mailbox next week for our **Numismatic Dealer Directory** brochure! Immediately upon receipt, return your information card to verify your company name, address, phone numbers, and staff listings. Remember that the basic listings of company name by state and last names by alphabetical cross-referencing are free! You just have to return the card.

My advertising brochure didn't arrive; please rush me a copy!

All you have to do is subscribe to the "*Bluesheet*" for 5 years

Dear CDN subscriber,

Every year we find more *Coin Dealer Newsletter* readers adding the *Certified Coin Dealer newsletter* to their numismatic libraries. As certified coins become an increasing factor in the numismatic marketplace, serious collectors and dealers are turning to the "*Bluesheet*" for the same accurate and reliable prices that they have come to depend upon for more than a quarter century. And in the current market, vast differences in the prices of certified and uncertified coins, as well as between the different certification services, means having up-to-the-minute information is more critical than ever.

Information from the Coin Dealer Newsletter family of publications means information that you can trust. Accurate, reliable, unbiased - and on time for more than 26 years. Information that can't help but save you money by making more informed buying and selling decisions.

And as part of our Holiday celebration, you can take advantage of our special extended subscription packages. You can save up to \$129 dollars - and if that isn't the best way to cheer your Holiday Season, we'll sell this page back to one of our regular advertisers. Send in your check today!

MS 65 PROOF-LIKE (IGM UNCIRCULATED PROOF-LIKE) will exhibit the same characteristics as the MS-65 - but with the additional feature of deep mirror proof-like surfaces both sides.

MS 67 & MS 67 PROOF-LIKE (SUPERB) will be 100% fully struck - and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices are for typical rolls with mixed grades from MS-60 MS-63. Any further qualifications, see Singles Page 4

THIS IS OUR LAST ISSUE OF THE DECADE

Happy Holidays To All

The Market in Depth

This is the last issue for 1989. Your next issue will be dated January 5, 1990. We would like to take this opportunity to wish all of our subscribers a safe and most joyous holiday season.

As we enter the decade of the 90's, it is almost impossible not to reminisce back to the nostalgia of the 80's or the melancholy of the 70's. The decade of the 1980's saw our former hobby blossom into a full-fledged industry. But with this transition also comes more responsibility toward the people to whom we cater. For better or for worse, the coin market has embraced the idea by which the stock market runs. It is in the minds of a strong faction of coin dealers that certified coins should be traded just like stocks. Maybe this is ultimately possible for the most generic coins available, however, the true collector of numismatic coins will always wish to view the coin prior to putting his money on the table.

The decade of the 70's was like a cakewalk compared to the 80's. Most dealers would describe the 70's as being on an extended vacation; prices were so much cheaper, grading was easier because prices were cheaper, and transactions took a longer period of time. Most dealers today would agree that the 70's were much more fun; that today, the coin industry is no longer fun but just business like any other business---with all the inherent problems that other industries have bestowed upon them.

For those of you who have not given much thought to the future of numismatics, I am sure that you are in for a big surprise. The 90's will probably bring the most incredible changes that our industry will ever see. The 90's will shape our industry for decades to come. Many of our industry leaders will, most likely, become involved in politics on a larger scale than they have in the past. It will be a necessity brought on by the changes in the tax laws among other factors. Everyone will need to become more sensitive to the whole "numismatic package", not just their own little business. Inasmuch as many dealers started out as a small business with concerns just for themselves, it will be a real transition for them to become involved with others for the betterment of the whole industry. A single entity is but a speck of sand, while hand-in-hand we can make a whole world of difference.

This Week's Market

CENTS: Activity has not picked up for BU Lincoln rolls this week. Most dealers continue to shy away from this area because rolls take up a lot of storage for very little potential profit.

NICKELS: BU rolls of Jefferson Nickels are faring no better than Lincoln

rolls. It just is not very profitable to stock rolls in hopes of making very little when they finally sell. To compound this problem even further, potential buyers want nearly perfect rolls. Even if the rolls are of this quality, it takes additional time for the customer to look through the rolls.

DIMES: The Roosevelt series is relatively steady at current levels, however, there is very limited activity at this time. This time of the year is not the busiest for BU rolls in general, and Roosevelt Dimes are no exception to this rule.

QUARTERS: There continues to be some sporadic Bidding activity in the Washington series. Most of the Bids are at current levels, although some of the late-date rolls are showing signs of increasing levels.

HALVES: The Franklin series remains the most active area of the BU roll market. They may not be moving up in value, but they are certainly more active than other areas. In contrast, the Kennedy series is beginning to slip a smidgen. Sellers can be found for various dates, and usually at discounted prices.

DOLLARS: The Dollar market remains in the spotlight as the most operative series. This means that despite the fact that there are numerous minus signs (there are plus signs also), dealers are still trying to fill want lists. It appears that many dealers are looking to buy at lower levels, thus creating the declines.

PROOF SETS and MINT SETS: Although Proof and Mint Sets are not showing a lot of increases in the charts, activity is very intense. This is quite characteristic at this time of the year as dealers try to fill the needs of those last minute shoppers.

COMMEMORATIVES: Silver Commems are showing some weakness in Bid levels even though many dealers have want lists to fill. Most needs are very specific at this time, thus, when some issues are offered at discounts, they may go unsold. Most dealers have sufficient inventories of Commems so they are not interested in stocking up on issues they already have.

TYPE: The Type market is hanging right in there. It appears that many dealers are anticipating higher levels at the FUN Show, so they are trying to build up their inventories. Again, they are looking for specific items, so the increases are not widespread.

GOLD: The Gold market appears to be rather steady at this time. Mint State issues seem healthy with a few "ups" and "downs" this week. High denomination circulated gold seems to be a function of "bullion psychology"; as the gold price goes up or down, so goes the Tens and Twenties.

EAGLES: American Proof Gold Eagles wholesale at: 1986 1 oz-\$435/\$449, 1987 1 oz-\$445/\$457, 1/2 oz-\$215/\$226, 1988 1 oz-\$645/\$685, 1/2 oz-\$310/\$345, 1989 1 oz-\$650/\$720, 1/2 oz-\$305/\$350. Proof Silver Eagles trade at: 1986-\$25/\$27, 1987-\$19.25/\$21.25, 1988-\$71/\$76, 1989-\$35/\$38. BU 1986 Silver Eagles wholesale at \$10.60/\$11.50.

Coin Dealer Newsletter: Certified Coin Market Indicator™

SERVICE	LOW	HIGH	AVERAGE
PCGS	94.4%	134.9%	101.0%
NGC	88.8%	105.2%	97.6%
ANACS	93.8%	110.0%	98.9%
NCI	27.8%	60.9%	42.0%

Use the Indicator to survey the entire market, not just a single issue. However, knowing these %'s will enable the reader to apply these numbers to specific CDN Bids in order to determine current market for certified coins.

A weekly comparison of ratios of certified coin Bid levels relative to CDN Bid levels (as 100%) sampled from 10 U.S. coin series (2 grades each). Chart reports the lowest and highest percentages found among the 20 comparisons, and the average of the 20 comparisons. All %'s relative to CDN as 100% base level. Data from latest issues of *CDN, Monthly Summary*, and *Certified Coin Dealer Newsletter*. For specific certified Bid levels, please refer to *CCDN*. Pre-1986 ANACS papers may bring considerably lower bids. ANACS Bids are sight seen; Bids of the other services are sight unseen. For more details on Indicator and a complete listing of series and issues refer to July 1988 *Monthly Summary*.

BULLION & FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)

THE GREYSHEET reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market. **INVESTORS NOTE:** The prices in the Newsletter are from dealer-to-dealer transactions. As an investor you may buy and sell coins through a dealer for a fee, as you would buy stock through a broker. Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

THE GREYSHEET

Numbers are used as shorthand for adjective grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins.

MS-60 - Unc. - may not have full mint lustre, may be dull, toned, or spotted. May be the worst possible example, but shows no wear or damage.

MS-63 - Choice BU - Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems), will have minor bagmarks and may show weakness of strike. Above average coins.

MS-64 - Distinct BU - Far and away nicer than MS-63, yet, a near-miss MS-65. Few contact marks in field, only minor marks on main devices. Full strike, with eye appeal. Attractive toning permissible.

MS-65 - Gem BU - Sharp, full strike. No major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins makes this no-question grade.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, and PCGS, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Memo from: HALLMARK GRADING SERVICE

To: Discriminating coin buyers everywhere

We are mighty proud of the fine network of rare coin dealers who are authorized submission centers for HALLMARK, the connoisseur's grading service.

Contact any dealer in the list below, and your coins, encapsulated in beautiful HALLMARK "slabs," will be back in your possession quickly. As we go to press our turnaround time is only 10 working days!

In addition to the technical or numerical grade, HALLMARK holders give additional information, as applicable, concerning Premium Quality, mintage figures, pedigree, attribution, etc.

Jump on the HALLMARK bandwagon! Contact your authorized HALLMARK dealer today. (Note to other dealers: Contact us for information about how YOU can participate in the HALLMARK program.)

The Emperor and the King Hold Court at PCGS.

Introducing our Canadian Coin Grading Service

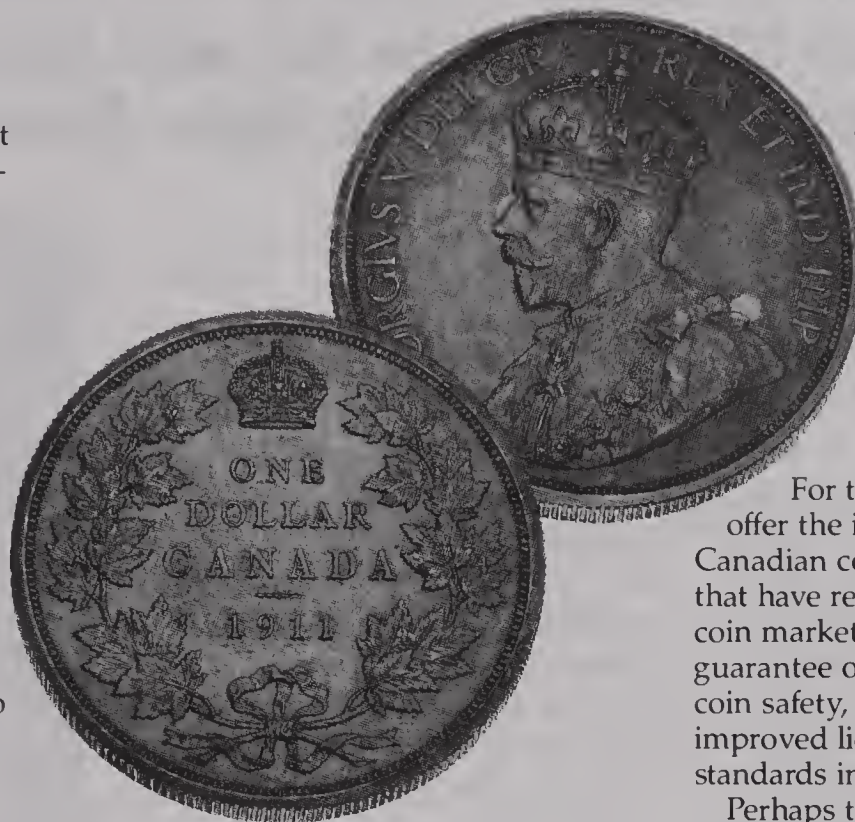

Nearly four years ago, the Professional Coin Grading Service was established to meet the urgent need for standardized, third-party grading in the rare coin industry.

Since 1986, PCGS has graded 1,628,961 U.S. coins with a cumulative declared market value of \$1,756,781,783 through a network of 490 authorized PCGS dealers throughout the United States and Canada.

Now PCGS is proud to announce a new service tailored to meet the needs of the Canadian coin market.

Over the past 18 months, PCGS has enlisted the expertise of many of the leading Canadian numismatists on the continent (including Walt Armitage, Sandy Campbell and Charles Moore) to diligently assemble a representative grading set of Canadian Coins.

With all systems in place, our new Canadian coin grading service is now

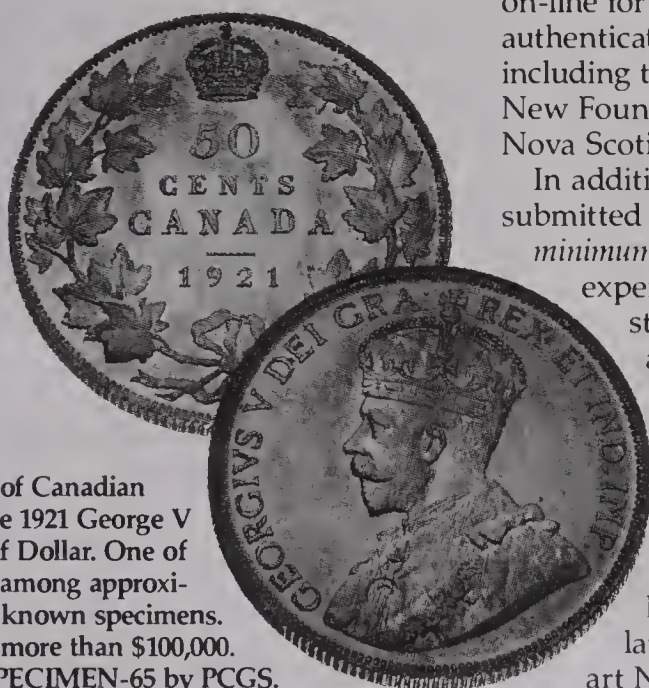

The Emperor of Canadian Coins. The 1911 George V Silver Dollar. One of two known specimens. Valued at \$750,000. Graded SPECIMEN-65. The first Canadian coin graded by PCGS.

For the first time ever, PCGS can offer the investors and collectors of Canadian coins the same advantages that have revolutionized the U.S. rare coin market: The unparalleled PCGS guarantee of grade and authenticity, coin safety, consumer protection, improved liquidity, and the highest standards in the industry.

Perhaps that's why PCGS was selected to grade the two most famous and highly valued Canadian numismatic rarities in existence: The Emperor and the King of Canadian coins.

Shouldn't your Canadian coins be graded by the Professional Coin Grading Service, too? For more information about all of our services, write or call today.

The King of Canadian Coins: The 1921 George V Silver Half Dollar. One of the finest among approximately 12 known specimens. Valued at more than \$100,000. Graded SPECIMEN-65 by PCGS.

on-line for the certification and authentication of Canadian coins, including the Maritime Provinces of New Foundland, New Brunswick, Nova Scotia and Prince Edward Island.

In addition, each Canadian coin submitted to PCGS is graded by a *minimum* of three members of our expert Canadian coin grading staff before the final grade is assigned. PCGS employs the same 70-point grading scale utilized in the grading of U.S. coins, and designates Mint State, Specimen, Proof-like and Proof Striking on Canadian coins. Each coin is also encapsulated in our new state-of-the-art NumisCap™ coin holder, as well.

The Emperor and the King displayed in the new PCGS NumisCap™ numismatic capsule.

\$16.95 Value For Just \$1.00

If you act quickly, you can obtain a copy of the best-selling book ever written on the subject of coin investment, a \$16.95 value, for just \$1. This may be the most incredible offer ever printed in the pages of *The Coin Dealer Newsletter*!

If you are interested in the subject of coin investment, Q. David Bowers' book, *High Profits From Rare Coin Investment*, is a "must." Hundreds of thousands of copies have been sold. Now in its 12th edition, it is far and away the best-selling book ever written on this important subject. Copies have a list price of \$14.95 plus \$2 postage and handling, for a value of \$16.95. However, if you act quickly we will send you one, postpaid, for just one dollar! Read on. . .

Why are we making this offer? The answer is simple: We believe that once you see this book you will agree that it is the best value you've ever received in the field of rare coins. Further, we will send you several catalogues (no obligation to make any purchases, of course) offering rare coins, books, accessories, and other items for sale. We believe that you, like thousands of other discriminating buyers worldwide, will find Bowers and Merena Galleries to be your ideal source for rare coin purchases!

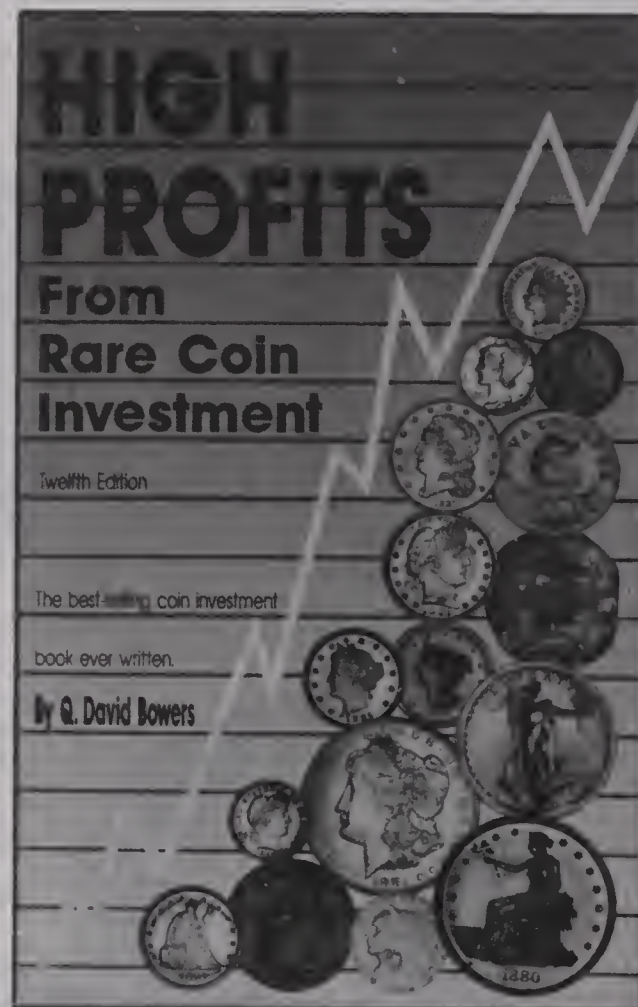

Concerning the book itself, as we are virtually giving it away, there may be no need to tell you more about it, but we can't resist telling you what *Coin World* had to say about it in a review: "Supplies useful information, backed by facts and figures, for the serious investor. Answers all questions in a straightforward manner. By one of the nation's most eminently successful professional numismatists." And, here is what *Numismatic News* had to say: "Details the formulas which have been successfully followed by thousands who have gleaned high profits through coin investment." And, here is one more comment, by the *Numismatic Literary Guild Newsletter*: "The book answers so many questions that investors should be will-

ing to pay 10 times the price to obtain it. Books such as this by experienced numismatists are all too rare."

AN INCREDIBLE GUARANTEE: Perhaps this is not necessary, but we want you to be delighted with the book, so we make this guarantee: If for any reason you are not 100% delighted, if you don't agree that it is everything that we, *Coin World*, *Numismatic News*, *The Numismatic Literary Guild Newsletter*, and others have said about it, just let us know and we will refund your \$1 and you can keep the book free!

"Fine Print" and how to order: This offer is limited to the first 2,000 requests received, so order early! Request "Incredible Book Offer" when you send your dollar. This offer is limited to shipments to U.S. addresses only; for shipment to foreign addresses the cost is \$10. This offer expires 90 days from the publication date.

A word to current owners of the book: If you already own the latest (12th edition) of this book, just send us a Xerox copy of your purchase invoice and we will send you a coupon worth the amount you paid, good toward future purchases of other books. You see, in that way you can participate in this Incredible Book Offer too!
